Executive Summary

This report documents the findings of the United States Postal Service's Household Diary Study (HDS) for Fiscal Year (FY) 2012. The three main study purposes are to:

- Measure the mail sent and received by U.S. households,
- Provide a means to track household mail trends over time, and
- Make comparisons of mail use between different types of households.

The report examines these trends in the context of changes and developments in the wider markets for communications and package delivery.

Background

The Household Diary Study survey, fielded continuously since 1987, aims to collect information on household use of the mail and how that use changes over time. The survey collects household information on demographics, lifestyle, attitudes toward mail and advertising, bill payment behavior, and use of the Internet and other information technologies.

The FY 2012 report covers Government Fiscal Year 2012, with comparisons to 2010, 2011, and other years, as appropriate.

The Household Diary Study collects information on household mail use and provides a look at how that use changes over time.

Overview

In 2012, U.S. households received 121.4 billion pieces of mail, and sent 14.8 billion, as seen in Table E.1. Mail sent or received by households constituted 83 percent of total mail in FY 2012. Fifty-seven percent of the mail households received was sent Standard Mail. Only three percent of household mail was sent between households; the rest was sent between households and non-households.

Table E.1:
Mail Received and Sent by Households
(Billions of Pieces)

Mail Classification	Received	Sent
First-Class Mail	45.5	14.4
Standard Regular Mail	55.8	—
Standard Nonprofit Mail	12.8	—
Periodicals	5.1	—
Package & Shipping Services *	2.3	0.4
Total	**121.4**	**14.8**
Household to Household	4.5	
Total Mail Received and Sent by Households	131.7	
FY 2012 RPW Total *	159.6	
Non-household to Non-household Residual	27.9	
Unaddressed	1.0	—

Note: Totals may not sum due to rounding.
** Includes First-Class and Standard Mail packages.*

Mail Markets

The Household Diary Study examines mail by the markets it serves. This design cuts across classes, but provides a foundation for understanding mail flows and the marketplace changes that affect them. Table E.2 shows the volume of household mail by market for 2010 through 2012.

Thirty five percent of household mail contains correspondence and transactions, a share that is unchanged from 2011. In terms of volume, total correspondence fell 6.3 percent compared to 2011. Since 2002, correspondence fell 38 percent. In part, the decline in correspondence is a continuation of long-term trends, but it is also strongly related to changing demographics and new technologies. Younger households send and receive fewer pieces of correspondence mail because they tend to be early adaptors of new and faster communication media such as e-mails, social networking, and smart phones.

Table E.2:
Household Mail Volume Received and Sent by Market Served
(Billions of Pieces)

Market	2010	2011	2012
Correspondence	12.9	12.6	11.8
Transactions	37.6	35.6	34.3
Advertising	83.5	85.0	79.6
Periodicals	5.5	5.4	5.1
Packages	3.6	4.0	3.3
Unclassified	4.7	3.9	3.6
Total	**141.2**	**139.1**	**131.7**

Source: HDS Diary Sample, FY 2010, 2011, and 2012.
Notes:
Correspondence and Transactions include 6.1 billion pieces of First-Class advertising-enclosed mail (excluded from totals).
Package volumes include ground packages and expedited, as well as 0.8 billion pieces of CD/DVD rentals.

In 2012, only 40 percent of all bills were paid by mail.

Electronic alternatives also affect transactions mail volume. Over time, automatic deduction and online bill pay account for a growing share of household bill payments. Compared to 2002, the percentage of bills paid by electronic methods increased from 17 percent to 56 percent in 2012. In contrast, bills paid by mail decreased from 75 percent to 40 percent of total payments over the same period of time. In-person payments decreased from 8 percent in 2002 to 4 percent in 2012. Similarly, the Internet has contributed to some decline in the share of bills and statements households received through the mail. Bills and statements received online continue to grow at a fast pace, albeit from a relatively small base (in 2012 households received an average of 1.7 pieces of bills and statements online, compared to 13.5 pieces in the mail).

Advertising mail represented well over half (60 percent) of all mail received by households in 2012. As shown in Table E.3, 86 percent of all advertising mail received by households is Standard Mail (68.6 billion pieces). The remainder consists of First-Class Mail; either stand-alone advertising (4.9 billion pieces), or advertising-enclosed pieces that are sent along with other matter (6.1 billion pieces).

Over time, the data show a steady decline in the share of First-Class advertising mail, from 21 percent in 2002 to only 14 percent in 2012.

Table E.3:
Advertising by Mail Class

Mail Classification	Volume *(Billions)*	Percent of Total Advertising
First-Class Advertising	11.0	14%
Standard Regular Mail	55.8	70%
Standard Nonprofit Mail	12.8	16%
Total Advertising Mail	**79.6**	**100%**

Source: HDS Diary Sample, FY 2012.

As shown in Table E.4, households received 5.1 billion Periodicals via mail in 2012, less than in both 2010 and 2011. More than three-quarters of these were magazines. Newspapers are only 15 percent of total Periodicals, down from 35 percent in 1987. Contributors to the decline in newspaper volumes were lower circulation and readership levels, as well as a strong growth of the Internet as an alternative delivery method over the past decade.

Table E.4:
Periodical Type Received

Mail Classification	Volume *(Billions)*	Percent of Total Periodicals
Newspapers	0.8	15%
Magazines	3.9	77%
Unclassified	0.4	8%
Total Periodicals	**5.1**	**100%**

Source: Household Diary Study, FY 2012.

In 2012, households received 2.9 billion and sent 0.5 billion packages. Compared to 2011, total packages sent and received decreased 17 percent, with most of the decline coming from CD/DVD rentals included in First-Class packages for this report. Excluding 0.8 billion pieces of CD/DVD rentals, total packages sent and received increased 6.7 percent. In general, delivery from mail order and Internet retailers is an important driver of package volume. While the HDS data is not designed to quantify this, there are indications that online auction sites (like eBay) are responsible for some of the recent increase in packages sent by households.

Table E.5:
Packages Received and Sent via the U.S. Postal Service
(Millions of Pieces)

Mail Classification	2012			
	Received		Sent	
	Number	Percent	Number	Percent
First-Class Mail	1,077	38%	402	75%
Expedited	360	13%	70	13%
Standard Mail	513	18%	—	—
Package & Shipping Services	791	28%	65	12%
Unclassified	106	4%	0	0%
Total Packages	**2,847**	**100%**	**537**	**100%**

Source: HDS Diary Sample, FY 2012.
Notes:
Totals may not sum due to rounding.
Expedited includes Priority Mail and Express Mail.
First-Class packages include 0.8 billion pieces of CD/DVD rentals sent to and received from Netflix, Blockbuster, etc., reported in First-Class Mail letters in Tables E.1, 1.5, and 1.6.

Chapter 1: Introduction – Volumes & Trends

The United States Postal Service Household Diary Study (HDS) Report documents the findings of the Fiscal Year (FY) 2012 study. The HDS measures the mail sent and received by U.S. households, tracks household mail trends, and compares mail use between different types of households.

> The Household Diary Study provides a means to track household mail trends over time.

The Survey

The Household Diary Study survey, fielded continuously since 1987, aims to collect information on household use of the mail and how that use changes over time. The survey collects household information on:

- Volumes of mail sent and received,
- Demographics,
- Attitudes toward mail and advertising,
- Bill payment behavior, and
- Use of the Internet and other information technologies.

These data are used for market research, forecasting, and strategic planning within the Postal Service.

The Survey Consists of Two Parts:

1) An **entry, or recruitment interview**, conducted by phone or Web, collects demographic and attitudinal information from about 8,500 households.
2) These households then receive a **mail diary**, which collects information on the mail the household sends and receives in a one-week period. Annually, about 5,200 households successfully complete the diary.

The data generated by these two instruments are the basis of the analysis in this report.

The HDS FY 2012 report covers the period from September 25, 2011, through September 28, 2012, roughly equivalent to the Government Fiscal Year (GFY) used by the Postal Service. Data from FY 2010 and FY 2011 are also reported on a GFY basis.

U.S. Postal Service Volumes

Serving a nation containing five percent of the world's population, according to the Universal Postal Union, the Postal Service delivers over 40 percent of the world's mail. The Postal Service delivered 159.9 billion pieces of mail in FY 2012—a decrease of 8.4 billion pieces, or 5.0 percent, from 2011.

In 2012, mail volumes were negatively impacted by the continuing migration of transaction and correspondence mail to the Internet and other electronic alternatives. Additionally, the sluggish economic recovery provided little or no boost to mail volumes.

Standard Mail volume, consisting mostly of advertising material, declined 5.8 percent (about 5.0 billion pieces) from 2011 to 2012, driven by a weak market for traditional advertising and a fragile economy.

In 2012, First-Class Mail volume fell 5.6 percent (about 4 billion pieces), continuing a long downward trend that began 2001. Ongoing diversion of correspondence and transaction mail to electronic alternatives and the weak economy were key contributors to the decline. First-Class Single-Piece letters and cards, impacted mostly by the growing use of online bill payments and emails, fell 8.1 percent from 2011 to 2012. Presort letters and cards (which include most of the advertising material that is sent First-Class) fell 3.7 percent from the combined impact of electronic diversion and a sluggish economy.

The Postal Service estimates the revenues, volumes, and weight of mail pieces going through the postal network by using a combination of statistical sampling systems, mailing statements, and accounting data. These data are published in the Revenue, Pieces, and Weight (RPW) Reports.

Table 1.1 presents the RPW volumes for FY 2012, along with data for FY 2011 and FY 2010.

Table 1.2 reports revenue, pieces, and weight data by class and shape for FY 2012.

- **The letters** column heading includes postcards and refers to pieces that are less than 11.5 inches wide by 6.125 inches tall and less than .25 inches thick.
- **Flats** consist of pieces that are greater than 11.5 inches wide, 6.125 inches tall, or .25 inches thick, but less than 12 by 15 by .75 inches.
- **Parcels** are pieces that are larger than 12 by 15 inches, or thicker than .75 inches.

Because of the difficulty involved in recording mail-piece characteristics in the Household Diary, these categories do not correspond precisely to the shape categories used by HDS respondents.

Table 1.3 is derived from Table 1.2 and shows the revenue per piece and weight per piece for each subclass of mail by shape.

Mail Flows

Mail volume can be broken into four basic flows, based on origin and destination. These flows are:

1) Household to household,
2) Household to non-household,
3) Non-household to household, and
4) Non-household to non-household.

Table 1.4a shows the total mail in each flow, and Table 1.4b shows pieces per household per week.

Table 1.4a:
Total Domestic Mail Flows
(Billions of Pieces)

Sent By:	Received By:		
	Household	Non-household	Total Originating
Household	4.5	10.3	14.8
Non-household	116.9	28.2	145.1
Total Destinating	**121.4**	**38.5**	**159.9**

Household Mail

As shown in Tables 1.4a-c, domestic mail to and from households constituted 82 percent of total mail volume in 2012, which equates to 20.9 pieces per week sent and received by U.S. households. Table 1.5 presents the volumes of mail sent and received by households as estimated from the HDS. The table shows the categories in which the households record their mail. Households received 121.4 billion pieces of mail and sent 14.8 billion. Both of these totals include the 4.5 billion pieces of mail that households sent to each other. The total mail received or sent by households in FY 2012 was 131.7 billion pieces.

Classes and Markets

- **First-Class Mail** is used to send transactional mail, correspondence, and advertising. Because it is limited to pieces weighing thirteen ounces or less, it primarily includes letters and cards.
- **Standard Mail** is advertising mail. For the most part, Standard Mail comprises letters and flats, although it contains a few postcards and packages as well.
- **Periodicals** are magazines and newspapers, and are predominantly flat-shaped.
- **Package and Shipping Services** is used to deliver merchandise, books, catalogs, and media such as CDs and DVDs. Most of this mail is parcel-shaped.

Table 1.7 crosswalks between classes of mail and the markets they serve.

Table 1.7:
Mail Received and Sent by Households

Class	Market *(Billions of Pieces)*					
	Correspondence	Transactions	Advertising	Periodicals	Packages	Total
First-Class Mail	11.8	34.3	11.0	—	1.5	52.5
Standard Mail	—	—	68.5	—	0.5	69.1
Periodicals	—	—	—	5.1	—	5.1
Packages & Shipping Services	—	—	—	—	1.3	1.3
Total	**11.8**	**34.3**	**79.6**	**5.1**	**3.3**	**128.1**
Unclassified						**3.6**
Total Mail Received and Sent by Households						**131.7**

Source: HDS Diary Sample FY 2012.
Notes: Correspondence and Transactions include 6.1 billion pieces of secondary advertising mail also reported in Advertising Mail.
The "Total" column for each class does not include pieces that could not be identified according to markets (Unclassified).
First-Class Packages include 0.8 billion pieces of CD/DVD rentals sent to and received from Netflix, Blockbuster, etc., reported in First-Class Mail letters in Tables E.1, 1.5, and 1.6.

Report Organization

The rest of the Household Diary Study report is organized around the markets the mail serves. Each chapter contains an analysis of the trends in the HDS data, as well as a discussion of how those trends affect and are affected by changes in the broader market. The following provides an overview of each chapter.

Chapter 2: Profile of Mail Usage gives an analysis of household demographics. This chapter examines demographic trends over time and their impact on the mail, and discusses attributing factors, such as access to technology and changing attitudes.

Chapter 3: Correspondence examines mail that is used solely or primarily to deliver (non-sales-related) communications, such as letters and greeting cards. This chapter includes analysis of both personal and business correspondence.

Chapter 4: Transactions reviews financial transactions in the mail and the impact of new technologies on that market. It analyzes household bill payment trends with a focus on technological and demographic change.

Chapter 5: Advertising Mail presents the trends in mail used to deliver sales-related messages. It contains information on household attitudes towards advertising by various media, treatment of advertising mail, and demographic determinants of advertising mail receipt.

Chapter 6: Periodicals examines magazines and newspapers delivered in the mail. It looks at how changing demographics are affecting the market for periodicals, and what the implications are for future volume.

Chapter 7: Packages analyzes household use of various types of packages, and it discusses the household market for merchandise delivery.

In addition, there are three appendices to the report:

Appendix A contains a set of comparative tables for FY 1987, FY 2011, and FY 2012, organized by class of mail. A concordance is presented for comparison with pre-2000 reports.

Appendix B documents the study methodology and discusses how the data were collected, weighted, and adjusted, and compares demographic data in the sample to that of the population as a whole.

Appendix C contains the instruments used to administer the survey.

Chapter 2: Profile of Mail Usage

Introduction

This chapter provides information on demographic trends and other factors affecting mail volume, providing a basis for assessing mail volume changes. The breakouts introduced provide the basis for much of the analyses in subsequent chapters.

The first section looks at growth in mail volume, population, households, and delivery points over recent decades. The next section examines the demographic characteristics of mail users, contrasting higher-mail-volume households with lower-volume households. The third section details the emerging demographic and technological trends that will affect the future of mail. The last section examines some of the factors affecting the use of post offices and mailboxes.

Mail Volume and Demographics

Total U.S. mail volume grew from 110 billion pieces in 1981 to 160 billion in 2012, an increase of 45 percent. This growth outpaced the rate of population growth and was close to household formation. Over the same period, according to the U.S. Census Bureau, the adult population grew 34 percent and households grew about 47 percent. The number of places to which the Postal Service delivers increased still faster, growing by 55 percent (see the USPS annual reports). As Table 2.1 shows, however, volume decreased by an average of 2.4 percent per year over the last eleven years (due to large declines from 2007 onward), while U.S. population growth, household formation, and delivery points increased by an average of about one percent per year. With falling revenues and rising costs, the Postal Service suffered significant financial losses towards the end of the decade.

Total U.S. mail volume decreased by an average of 2.4 percent per year between 2001 and 2012, while population and household formation increased by an average of about one percent per year.

The 1980s was a time of extraordinary mail volume growth that began in 1978 and continued through 1988. In 1984, mail volume grew more than ten percent. During this period, technology facilitated this growth. Construction of computerized databases and techniques for sorting large amounts of data created a fertile climate for direct mail marketing. Computerization of financial systems encouraged billing by mail and payments through the mail. These innovations in business processes were further encouraged by the expansion of postal rate discounts.

The Postal Service introduced work-sharing discounts, encouraging mailers to prepare the mail in ways that reduce the total system cost of creating and delivering the mail. Mailers could take advantage of these discounts by sorting the mail in advance. The Postal Service would receive the mail presorted to the individual ZIP codes and/or to the carrier routes associated with those ZIP codes.

In the late 1980s and early 1990s, mail volume growth barely kept pace with household growth. The demand for mail was hurt by a recession and two very large rate increases. This was also a period in which the Postal Service absorbed substantial costs that were reapportioned from the Federal government's retirement programs.

Table 2.1:
Mail Volume and Demographics
Average Annual Growth, 1981-2012

	1981-1990	1991-2000	2001-2012
Total Mail Volume	4.6%	2.3%	-2.4%
Delivery Points	1.7%	1.5%	0.9%
Adult Population	1.5%	1.3%	1.2%
Households	1.4%	0.9%	1.0%

Source: U.S. Postal Service, U.S. Census Bureau.

The latter half of the 1990s saw rapid growth in mail volume, spurred by a strong economy and rates that increased by less than inflation. The Postal Service also realigned the incentives built into its price structure. It reduced the incentives mailers had for presorting mail and encouraged them to prebarcode their mail. By 2002, the majority of letters the Postal Service received had qualifying barcodes on them. This restructuring of the rates took advantage of the extensive automation of mail preparation and sorting that occurred in the previous decade.

During the 1990s, the U.S. economy rapidly embraced information technology and integrated the Internet into its business processes. An economic recession followed that began in March 2001. The 2001 terrorist attacks on the World Trade Center and the Pentagon led to large-scale disruptions of those mail services dependent on air transport, such as First-Class, Priority, and Express Mail. When air service was restored, Priority Mail was no longer allowed on commercial passenger flights. Soon afterwards, lethal anthrax was sent through the mail, which resulted in five deaths and a number of serious injuries. These terrorist attacks, combined with the economic recession, caused mail volume to decline 2.2 percent in 2002, which was, at the time, the largest annual decline since World War II. In 2003, Standard Mail volume recovered to a new high, but total First-Class volume continued to decline. Work-shared First-Class Mail fell for the first time ever. Since 2003, Standard Mail volume grew along with the economy, reaching new highs and exceeding First-Class Mail for the first time in 2005. Total First-Class volume, on the other hand, continued to decline, in part due to the diversion of bills and statements to electronic alternatives and the lower-cost Standard Mail option as an alternative to First-Class advertising.

The economic recession that began in December 2007 and ended in June 2009 had a severe impact on the mail. Total mail volume plunged 12.7 percent in 2009—the largest decline since the Great Depression. In July 2009, the recession was officially over but was followed by a slow recovery that continued through the end of 2012. As a result, total mail volume declined an additional ten percent between 2009 and 2012. Both Standard Mail and First-Class Mail contributed to the overall decline in mail volume, falling 3.8 and 18.0 percent respectively.

Between 2001 and 2012, total mail volume fell 23 percent. During the same time period, the adult population increased 14 percent, households increased 12 percent, and the Postal Service added ten percent more delivery points to its network.

Continued growth in delivery points has become an ongoing source of pressure on postal costs.

The Postal Service depends on mail volume growth to fund universal service. The number of addresses the delivery network serves increases as the number of American businesses and households increases. When mail volume falls, as was the case between 2001 and 2012 the Postal Service's ability to fund delivery service is hampered because the Postal Service charges its customers for piece volume but does not assess connect charges, access fees, or system fees, like many other network enterprises.

Characteristics of Higher- and Lower-Volume Households

Tables 2.2 and 2.3 show the demographic characteristics of households by the amount of mail received. It is apparent that household mail use is strongly correlated with both income and education. Note, however, the similar correlation between mail receipt and Internet access, which is also related to income and education. Therefore, households that make the most use of the mail are the households with the greatest opportunity to use alternatives to the mail.

These high-volume households are taking advantage of the opportunity to move away from the mail. Households that receive 30 or more pieces of mail each week pay an average of 37 percent of their bills online, up from 33 percent in 2010 and 35 percent in 2011. Households that receive less than 30 pieces of mail each week are quickly catching up, however, as they paid an average of 35 percent of their bills online. The percentage of online bill payments among these lower-volume households has increased from 28 percent in 2010 and 30 percent in 2011.

Table 2.2:
Characteristics of Higher- and Lower-Mail-Volume Households

Mail Received *(Pieces per Household per week)*	Households *(Millions)*	Median Annual Household Income	Households w/ Internet Access *(Percent)*	Total Paid *(Pieces per Household per week)*	Bills Paid by Internet *(Pieces per Household per week)*	Mail Sent *(Pieces per Household per week)*
45 or more	7.3	$101,193	92%	3.6	1.2	5.3
36-44	9.9	$89,536	91%	3.4	1.4	3.5
30-35	12.2	$79,756	93%	3.4	1.3	3.2

Note: Percentages may not total 100 percent due to heads of households who did not answer the educational attainment question. Percentages in this table are row percentages.
Excludes households not receiving any mail delivery at their home address (using mailbox only).

Demographic Characteristics of U.S. Households

This section develops breakouts of households by demographic categories that influence the volume of mail sent and received. It looks at both traditional and newly emerging factors. The following chapters will show how mail volume varies with these household characteristics.

Income, Education, and Age

Traditionally, mail use was largely determined by household income, education, and age. As Table 2.4 shows, income and education are strongly correlated with each other, as expected.

The relationship between income and age, shown in Table 2.5, is somewhat more complicated. Up to retirement, household income and age are fairly closely related. After retirement, households earn substantially less; although by that point, mail behavior is pretty well set, and older households continue to receive similar amounts of advertising and periodicals, and pay similar amounts of bills, even though their income declines.

Table 2.4:
Households by Income and Education
(Percent of Households)

Household Income *(Thousands)*	Educational Attainment of Head of Household				Total
	Less than High School	High School Graduate	Some College or Technical School	College Graduate	
Under $35	25%	36%	24%	15%	100%
$35 to $65	11%	34%	26%	29%	100%
$65 to $100	4%	26%	22%	48%	100%
Over $100	1%	14%	18%	67%	100%

Note: Totals may not sum due to rounding.

Table 2.5:
Households by Income and Age
(Percent of Households)

Household Income *(Thousands)*	Age of Head of Household				Total
	Under 35	35 to 54	Over 55	Don't Know/ Refused	
Under $35	22%	28%	50%	0%	100%
$35 to $65	24%	34%	41%	0%	100%
$65 to $100	21%	45%	34%	0%	100%
Over $100	15%	53%	32%	0%	100%
Don't know/ Refused	24%	29%	42%	5%	100%
Total	**21%**	**37%**	**41%**	**1%**	**100%**

Source: HDS Diary Sample, FY 2012.
Note: Totals may not sum due to rounding.

Household Size

The majority of U.S. households include either one or two adults, but households with three or more adults make up 19 percent of the total. Once considered the norm, nuclear families—two adults and at least one child—now account for only 20 percent of households (per the U.S. Census Bureau). The changing composition of households impacted the amount and kinds of mail sent and received by households over the past 20 years, generating more and different kinds of advertising mail, as well as affecting transaction mail trends (bills tend to be tied to households as much as to individuals).

Table 2.6:
Households by Number of Adults
(Millions of Households)

Number of Adults	
One	28.2
Two	70.0
Three or more	22.9
Total Households	**121.1**

Note: Totals may not sum due to rounding.

Table 2.7:
Households by Size
(Millions of Households)

Household Size	
One person	24.7
Two	45.0
Three	20.1
Four	17.5
Five or more	13.8
Total Households	**121.1**

Source: HDS Diary Sample, FY 2012.
Note: Total may not sum due to rounding.

Internet Access

Access to the Internet and use of new technologies, such as Broadband, have a large and growing impact on mail use. Bills, statements, and bill payments still represent a significant number of pieces sent and received by households. However, electronic activity in this area is diverting mail once used for these purposes. On the other hand, online shopping potentially adds packages and catalog delivery to the Postal Service mail stream.

Table 2.8 shows that 84 percent of households have Internet access and 79 percent have Broadband access. The highest levels of Internet and Broadband access are within households with incomes over $100,000 (98 and 95 percent, respectively), as seen in Figure 2.1a. In comparison, households with incomes below $35,000 are less likely to have access to the Internet and Broadband (61 and 54 percent, respectively). As shown in Figure 2.1b, age is also an important determinant of households having Internet access. Younger households (heads of households younger than 35 years old) are more likely to have access to both the Internet and Broadband (93 and 90 percent, respectively). Older households (heads of households older than 55 years of age), on the other hand, are less likely to have access to the Internet and Broadband (67 and 60 percent, respectively).

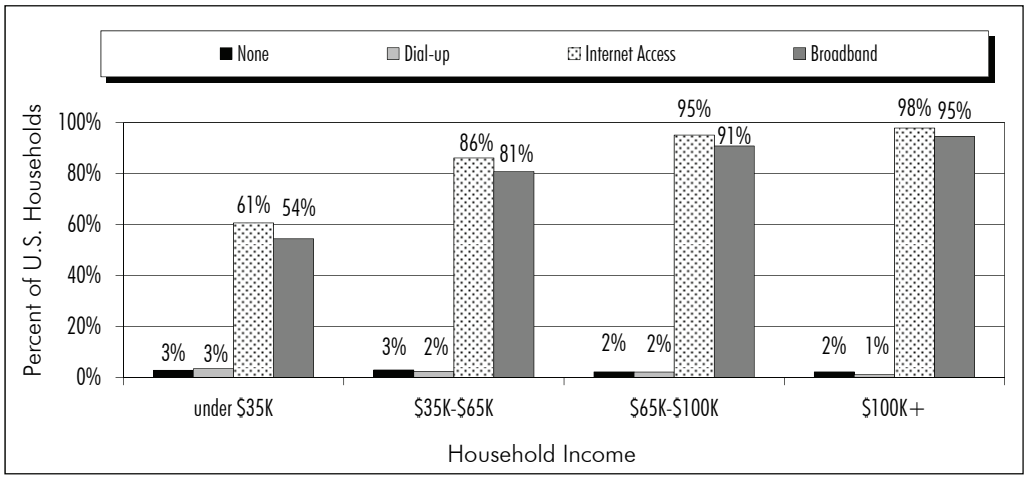

Table 2.8:
Households by Type of Internet Access
(Millions of Households)

Type of Internet Access	
Broadband	95.5
Dial-up	6.5
None	19.0
Total Households	**121.1**

Source: HDS Diary Sample, FY 2012.
Note: Totals may not sum due to rounding.

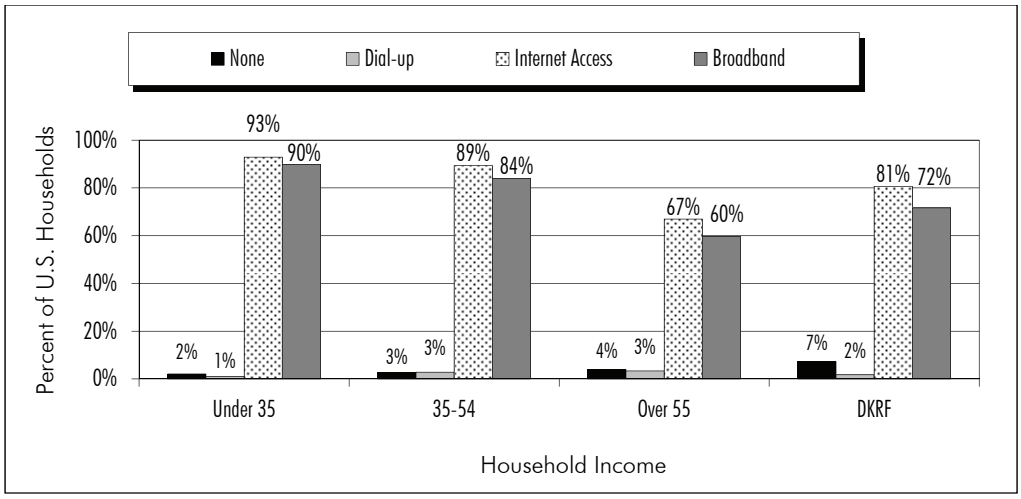

Figure 2.2 shows the trend in Broadband connections. The rapid growth of Broadband expands the potential scope of electronic diversion of the mail. The Internet's fast, always-on connection makes it a stronger alternative medium for the delivery of entertainment, information, and communication. As more households begin using Broadband, the more that bill payments, bill and statement presentment, periodicals, and even advertising mail, will be affected.

Figure 2.1a:
Internet Access by Income and Type

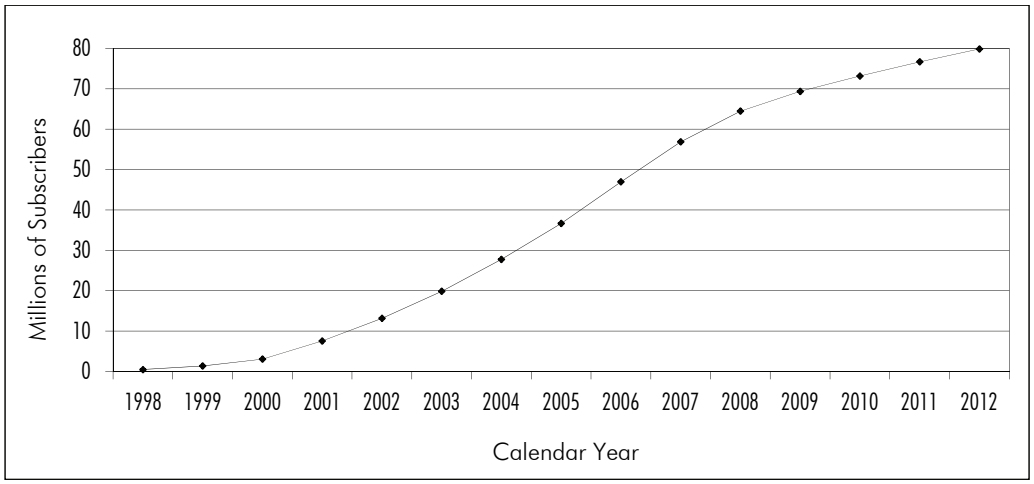

Source: HDS Recruitment Data, FY 2012.
Note: Sum of Internet Access and None does not equal 100 percent due to missing responses and access outside the home only. Sum of Broadband and Dial-up does not equal the 100 percent due to missing responses.

Note: Sum of Internet Access and None does not equal 100 percent due to missing responses and access outside the home only. Sum of Broadband and Dial-up does not equal the 100 percent due to missing responses.

Figure 2.2:
Broadband Subscribers

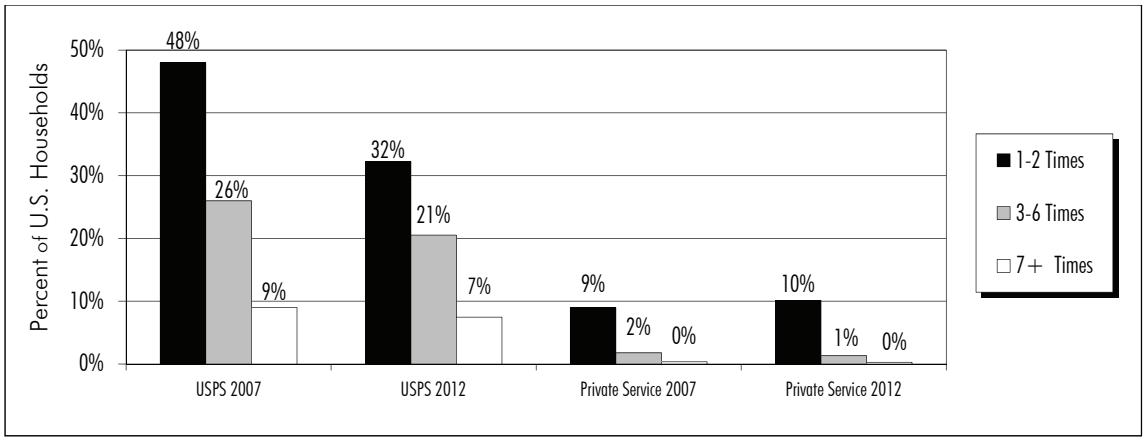

Source: Leichtman Research Group.

Use of the Post Office

The Postal Service currently owns and operates 31,272 post office locations throughout the U.S. As shown in Figure 2.3, in spite of a declining frequency of visits over the past five years, the use of post offices for mailing services continues to dominate the mail service industry. Sixty percent of all U.S. households patronize a post office at least once a month, while just 11 percent visit a private mailing company. Over 28 percent of all households in the U.S. visit the post office three or more times a month. Even with the continued availability of mail-related products and services through alternative modes (such as Internet orders), in-person visits to postal facilities remain strong.

A rented mailbox is one alternative that households use to manage their mail. In 2012, 3 percent of all households in the U.S. rented mailboxes from the Postal Service, and 1 percent rented a box from a private company. Post office box use, however, declined in the past ten years, with 3 percent of U.S. households renting a post office box from the Postal Service in 2012, compared to 10 percent in 2001.

Chapter 3: Correspondence

Introduction

This chapter examines correspondence mail among households and between households and businesses, including letters, greeting cards, invitations, and announcements. In several cases, this chapter, and several following it, examines comparisons in data between 2010 and 2012, providing an illustration of mail trends over time.

Correspondence Mail Volume

Total correspondence sent and received represents about nine percent of all household mail volumes, as shown in Table E.2. Table 3.1 provides a recent history of total correspondence volumes, showing an 8.4 percent decline from 2010 to 2012. Personal correspondence, which is essentially household to household mail, fell 13.2 percent from 2010 to 2012, continuing a long-term decline that started 25 years ago. In 1987, households reported receiving 1.6 pieces of personal correspondence each week. By 2012, personal correspondence received declined 56 percent, to just 0.7 pieces per household per week.

In large part, this decline stemmed from competition from an ever-changing landscape of communication technologies, such as affordable long-distance telephone service and, more recently, e-mail, social networking, and cellular communications—all of which provide an alternative to personal letters and business inquiries. Such advances in technological communications completely transformed the marketplace, and continue to have an impact on personal correspondence.

Correspondence Mail and Household Characteristics

The following tables break down correspondence mail sent and received by households using the demographic categories developed in Chapter 2.

Income, Education, and Age

Tables 3.2 and 3.3 on the following page show that both household income and educational attainment have a strong effect on correspondence sent and received by households. In many cases, the volume of correspondence sent and received by households with the highest income or the highest education is more than double the volume that is sent and received by households with the lowest income or the lowest education.

Table 3.1:
First-Class Correspondence Mail Sent and Received by Sector

Sector	Volume *(Millions of Pieces)*			Change, 2010-2012
	2010	2011	2012	
Household to household	4,959	4,387	4,302	-13.2%
Non-household to household	6,082	6,464	6,079	0.0%
Household to non-household	1,882	1,762	1,453	-22.8%
Total	**12,922**	**12,613**	**11,833**	**-8.4%**
Sector	**Pieces per Household per Week**			**Share of 2012 Total**
	2010	**2011**	**2012**	
Household to household	0.8	0.7	0.7	36.4%
Non-household to household	1.0	1.0	1.0	51.4%
Household to non-household	0.3	0.3	0.2	12.3%
Total	**2.1**	**2.0**	**1.9**	**100%**

$35 to $65	1.2	.9	.8	1.1	**1.0**
$65 to $100	1.0	1.3	1.0	1.2	**1.2**
Over $100	.0	.9	1.0	1.3	**1.2**
Average	**.6**	**.9**	**.8**	**1.1**	**.9**

Source: HDS Diary Sample, FY 2012.
Note: Excludes Don't Know/Refused.

Tables 3.4 and 3.5 show that age also has a significant effect on correspondence mail sent and received by households. Regardless of their income, in most cases, younger households both send and receive fewer pieces of correspondence mail. Young adults have traditionally sent and received less mail than older adults, but the advent of the Internet age widened the gap between these two age groups.

Table 3.4:
Correspondence Mail Received by Income and Age
(Pieces per Household per Week)

Household Income *(Thousands)*	Age of Head of Household			Average
	Under 34	35 to 54	Over 55	
Under $35	.8	1.0	1.1	**1.0**
$35 to $65	1.6	1.8	1.7	**1.7**
$65 to $100	1.7	1.7	2.3	**1.9**
Over $100	2.0	2.3	2.3	**2.3**

Table 3.5:
Correspondence Mail Sent by Income and Age
(Pieces per Household per Week)

Household Income *(Thousands)*	Age of Head of Household			Average
	Under 34	35 to 54	Over 55	
Under $35	.4	.4	.6	**.5**
$35 to $65	.9	1.0	1.0	**1.0**
$65 to $100	1.2	.9	1.5	**1.2**
Over $100	1.1	1.2	1.2	**1.2**
Average	**.8**	**.9**	**1.0**	**.9**

Source: HDS Diary Sample, FY 2012.

Household Size

As would be expected, household size has a positive effect on correspondence mail. Tables 3.6 and 3.7 show that the jump from one person to two is associated with a considerable increase in correspondence mail. Further increases in size can have varying effects. As shown in Table 3.7, these increases are generally because of the presence of an additional adult in the household.

Table 3.6:
Correspondence Mail Received and Sent
by Household Size
(Pieces per Household per Week)

Household Size	Received	Sent
One person	1.2	.7
Two	1.7	1.0
Three	1.6	.9
Four	1.9	1.0
Five or more	2.0	1.0
Total	**1.6**	**.9**

One	1.1	.6
Two	1.8	1.0
Three or more	1.9	.9
Average	**1.6**	**.9**

Source: HDS Diary Sample, FY 2012.

Internet Access

Table 3.8 shows that households with Internet access (Broadband and Dial-up) tend to send and receive more correspondence mail than households without such service. The explanation for this somewhat counterintuitive result is the high correlation among income, educational attainment, and the presence of an Internet connection in the home. As Table 3.9 shows, households with Internet access have a greater average income than households without a connection. Similarly, on average, households with Internet access have a higher level of education than those without access. In fact, these correlations could be a warning sign for mail, since more volume goes to households that are vulnerable to diversion.

Table 3.8:
Correspondence Mail Received and Sent by Type of Internet Access
(Pieces per Household per Week)

Type of Internet Access	Received	Sent
Broadband	1.8	1.0
Dial-up	1.4	.7
None	1.0	.6

Broadband	62,964	42%
Dial-up	41,761	26%
None	21,529	11%

Source: HDS Diary Sample, FY 2012.

Personal Correspondence

In FY 2012, personal correspondence accounted for an average of 0.7 pieces of mail per week, which is about the same as in 2011 and lower than in 2010. Table 3.10 shows the total volumes and average number of pieces by personal correspondence type.

The volume of personal letters continued to decline in 2012—a trend primarily driven by the adoption of the Internet as a preferred method of communication. Similarly, all other types of personal correspondence also fell because of the increasing availability of new electronic alternatives (such as e-cards, e-vites, smart phones, and social networks).

Each year, the rise of these new virtual technologies continues to change the way friends and family stay in touch. The weak economic recovery also contributed to the decline, as spending on cards and other correspondence-related products likely decreased.

Table 3.10:
Personal Correspondence Sent and Received

Correspondence Type	Volume *(Millions of Pieces)*			Change, 2010-2012
	2010	2011	2012	
Personal Letters	850	644	650	-23.5%
Holiday Greeting Cards	2,073	1,945	1,944	-6.2%
Non-Holiday Greeting Cards	1,295	1,173	1,086	-16.2%
Invitations/Announcements	522	492	460	-11.8%
Other Personal	219	133	162	-25.9%

Correspondence Type	**Pieces per Household per Week**			**Share of 2012 Total**
	2010	**2011**	**2012**	
Personal Letters	.1	.1	.1	15.1%
Holiday Greeting Cards	.3	.3	.3	45.2%
Non-Holiday Greeting Cards	.2	.2	.2	25.2%
Invitations / Announcements	.1	.1	.1	10.7%
Other Personal	.0	.0	.0	3.8%
Total	**.8**	**.7**	**.7**	**100.0%**

Source: HDS Diary Sample, FY 2010, 2011, and 2012.
Note: Totals may not sum due to rounding.

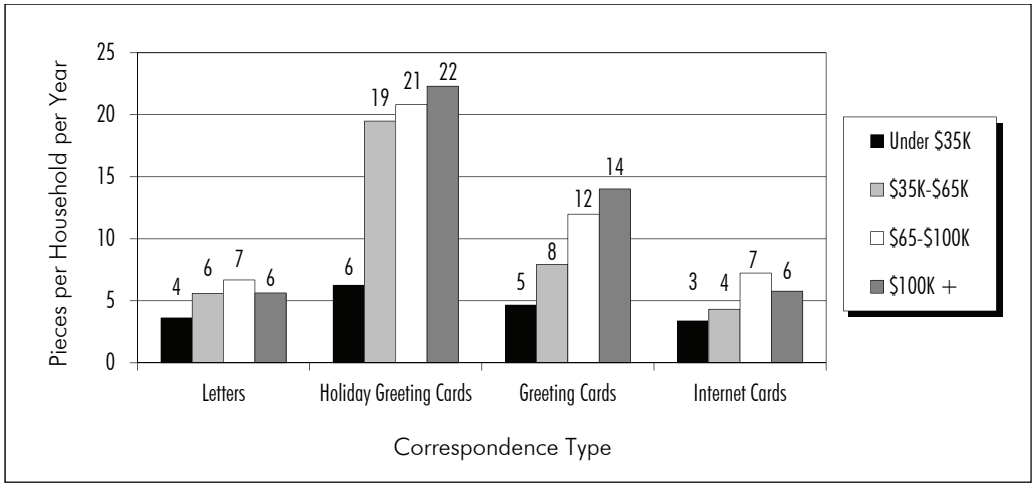

Figure 3.1 shows the major personal correspondence types by income. Personal correspondence sent by households seems to follow a pattern of higher-income households being more likely to send letters, holiday cards, and non-holiday greeting cards than lower-income households.

The largest disparity between high- and low-income households is in the volume of holiday greeting cards sent. Households with incomes greater than $100,000 sent an average of 22 holiday greeting cards in FY 2012, compared to the 6 cards sent by households with incomes lower than $35,000.

Internet card use is gradually growing to a level comparable to non-holiday greeting card mail.

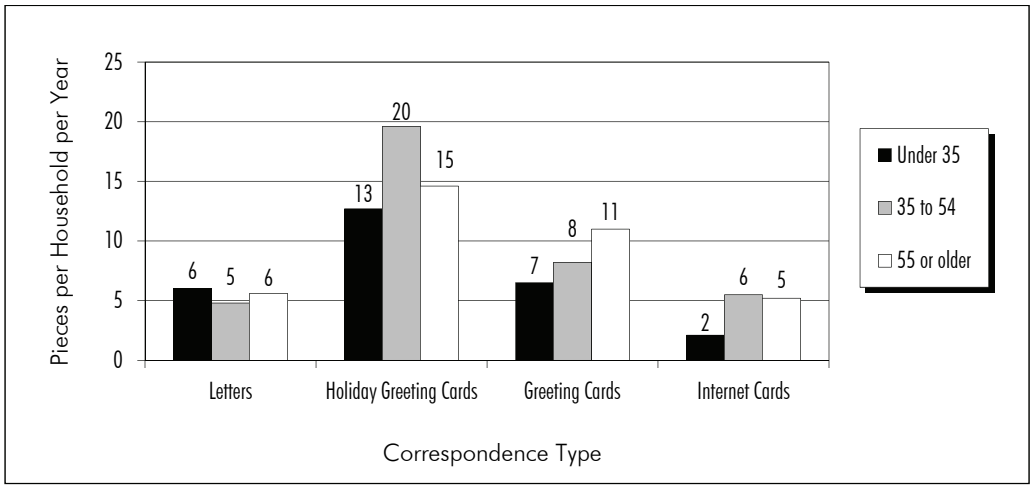

The number of letters and greeting cards sent also seems to follow a pattern where the older the head of household, on average, the more the greeting cards that are sent. Figure 3.2 illustrates this point. Use of social media to send greetings at no cost could explain, in part, the low number of internet cards sent by younger heads of household.

Figure 3.1:
Personal Correspondence Sent by Income Group
(Pieces per Household per Year)

Source: HDS Diary Sample, FY 2012.

Figure 3.2:
Personal Correspondence Sent by Age Cohort
(Pieces per Household per Year)

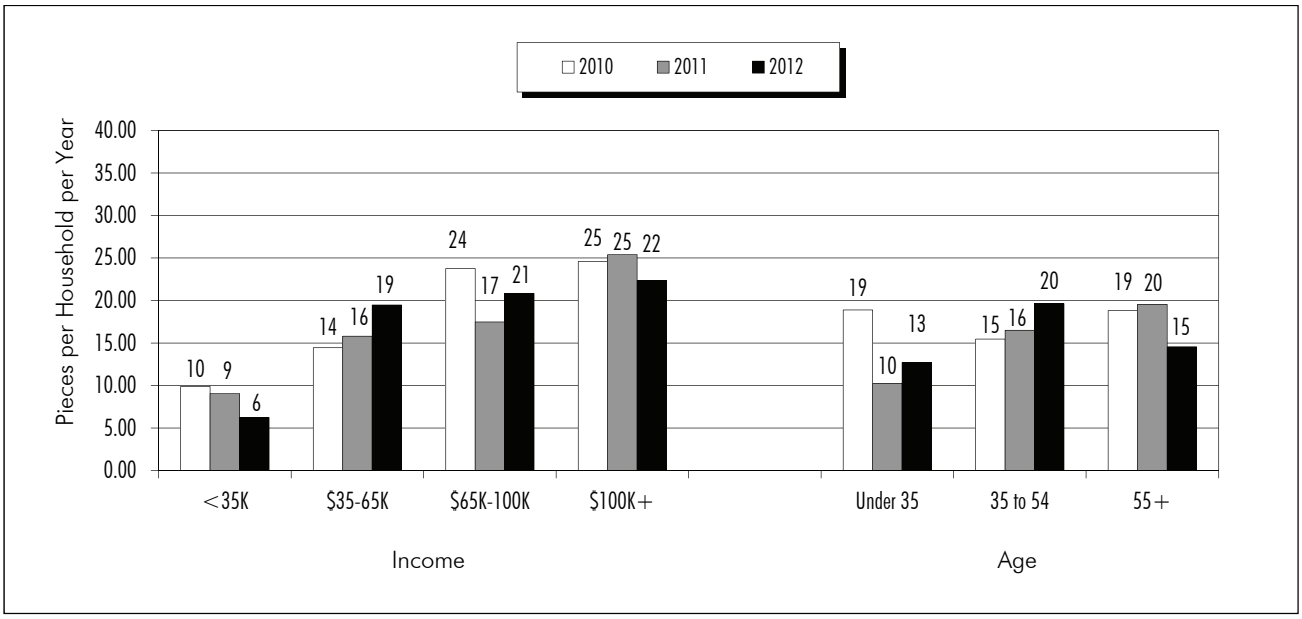

Source: HDS Diary Sample, FY 2012.

The relationship between holiday greeting cards sent and income is shown in more detail in Figure 3.3. In FY 2012, as in prior years, higher-income households sent the most holiday greeting cards. Households with incomes greater than $100,000 sent 22 holiday greeting cards, while households with incomes lower than $35,000 sent only six holiday greeting cards in FY 2012.

When examined by age, the number of holiday greeting cards sent is typically much greater for households where the head of household is older. In 2012, households where the head of household is aged 55 or older, on average, sent 15 holiday greeting cards, while households where the head of household is younger (35 or younger) sent thirteen.

Figure 3.3:
Holiday Greetings Sent by Age and Income, FY 2010, 2011, and 2012

Source: HDS Diary data, Diary Sample only, FY 2010, 2011, and 2012.

As shown in Table 3.11, households with Internet access (particularly Broadband) receive more letters, holiday cards, and non-holiday greeting cards, compared to households without Internet access. As discussed earlier, households with Internet access, on average, have higher income and education levels (see Table 3.9) -- attributes that typically lead to a greater use of written correspondence.

Table 3.11:
Personal Correspondence by Type of Internet Access
(Pieces per Household per Week)

Correspondence Type	No Internet Access	Dial-up	Broadband
Personal Letters	.09	.07	.11
Holiday Greeting Cards	.15	.17	.35
Non-Holiday Greeting Cards	.11	.14	.19
Total	**.35**	**.37**	**.65**

Business Correspondence

This section of the report provides data on correspondence types between households and businesses. In addition to correspondence mail, households and businesses exchange bill payments, statements, and advertising (discussed in Chapters 4 and 5). Table 3.12 outlines volumes by types of correspondence for 2010 through 2012. Correspondence received from the non-household sector accounts for about 50 percent of all correspondence sent and received by households (see Table 3.1).

Invitations and announcements represent 44 percent of business and government correspondence received by households. Announcements are also the main type of social correspondence households receive; in 2012 they represented 75 percent of all social mail received.

Table 3.12:
Business Correspondence Type (Sent and Received) by Sector (Millions of Pieces)

Business Correspondence Type	2010	2011	2012	Change, 2010–2012
Business/Government/Social Received by Households				
Invitation/Announcement	1,781	2,003	2,048	15.0%
Holiday Greeting from Business	323	358	294	-9.0%
Other Business/Government	2,050	2,381	2,295	12.0%
Total Business/Government Received	**4,154**	**4,742**	**4,637**	**11.6%**
Announcement	1,375	1,241	1,082	-21.3%
Other Social	552	481	359	-34.9%
Total Social Received	**1,928**	**1,722**	**1,442**	**-25.2%**
Total Received	**6,082**	**6,464**	**6,079**	**0.0%**

Total Social Sent (Social includes social, political & nonprofit.)	**372**	**309**	**255**	**-31.5%**
Total Sent	**1,881**	**1,761**	**1,453**	**-22.8%**

Source: HDS Diary Sample, FY 2010, 2011, and 2012.
Notes: Totals may not sum due to rounding.
Increases in correspondence between households and non-households are due to 2011 survey questionnaire improvements which restated previously unclassified mail.

Chapter 4: Transactions

Introduction

This chapter examines the volumes and trends in transactions mail: the bills, statements, payments, donations, rebates, and orders sent and received by households. Information is presented on household bill payment trends, which is of particular interest, as the availability of electronic alternatives affects traditional transactions mail.

Transactions Mail Volume

Transactions sent and received constitute 26 percent of all household mail volumes (as seen in Table E.2) and 62 percent of household First-Class Mail; as such, they are an important part of the mail stream. Although many businesses use electronic funds transfer (EFT) or other electronic technologies to settle transactions, households still receive and pay a majority of their recurring bills through the Postal Service. As the Internet and Broadband become more ubiquitous, however, the movement towards consumer Electronic Bill Presentment and Payment (EBPP) is expected to continue gaining momentum.

As Table 4.1 shows, the total transactions volume sent and received by households fell 8.8 percent between 2010 and 2012. All major transaction categories contributed to the decline (the increase in insurance related transactions is due to a restatement of previously unclassified mail). Electronic diversion continues to erode the volume of mail payments in favor of online payments, automatic deductions from bank accounts, and other electronic methods of bill payment. The availability of new payment alternatives, accompanied by an unprecedented economic downturn, resulted in a 16.2 percent decline in bills paid by mail between 2010 and 2012. The growth in non-mail methods of payments is also evident in Table 4.1, which shows that bills paid by mail are far fewer than total bills received (as discussed below, only 40 percent of all household bills were paid by mail in 2012).

Table 4.1: Transactions Mail Sent and Received

Transaction Type	Volume *(Millions of Pieces)*			Change, 2010–2012
	2010	2011	2012	
Business				
Bills	16,132	14,927	14,082	-12.7%

Historical data was restated as a result of improvements to the 2011 survey questionnaires, which restated previously unclassified mail. The increase in the newly created insurance related category is also related to the changes to the questionnaires.

Transactions Mail and Household Characteristics

The following tables break down transactions mail sent and received by households based on the demographic categories introduced in Chapter 2.

Income, Education, and Age

As seen in Tables 4.2 and 4.3, household income and educational attainment influence the amount of transactions mail sent and received. In most cases, income has a much greater impact on transactions mail received than sent. The basis for this relationship is that higher-income households are more likely to be broadband households and more likely to pay bills through non-mail means. The tables also show that income has a greater impact on transactions mail than education. Better-educated households, on average, have more financial accounts, insurance policies, and credit cards—all generators of transactions mail volume.

Table 4.2:
Transactions Mail Received by Income and Education
(Pieces per Household per Week)

Household Income *(Thousands)*	Educational Attainment of Head of Household				Average
	Less than High School	High School Graduate	Some College or Technical School	College Graduate	
Under $35	3.2	3.1	2.7	2.9	**3.0**
$35 to $65	4.8	4.5	4.7	3.7	**4.4**
$65 to $100	5.4	5.4	5.4	4.5	**5.0**
Over $100	4.7	5.9	4.9	5.6	**5.5**
Average	**3.7**	**4.3**	**4.2**	**4.6**	**4.3**

Table 4.3:
Transactions Mail Sent by Income and Education
(Pieces per Household per Week)

Household Income *(Thousands)*	Educational Attainment of Head of Household				Average
	Less than High School	High School Graduate	Some College or Technical School	College Graduate	
Under $35	1.0	.9	.8	1.0	**.9**
$35 to $65	1.5	1.5	1.4	1.1	**1.3**
$65 to $100	1.7	1.5	1.4	1.0	**1.3**
Over $100	0.1	1.3	1.3	1.1	**1.2**
Average	**1.1**	**1.3**	**1.2**	**1.1**	**1.2**

Source: HDS Diary Sample, FY 2012.

Tables 4.4 and 4.5 show that age has a strong effect on transactions mail, independent of income. Across all income categories, younger households send and receive less transactions mail. In part, this is because such households are less likely to own their home and have fewer insurance policies, investments, and the like. However, it is also the case that these households are more active users of electronic alternatives to traditionally mail-based transactions. This is particularly evident for transactions mail sent (primarily bill payments) where households in which the head of household is aged under 35 years sent only about one-half as much mail as households where the head of household is 35 or older.

Across all income categories, younger households send and receive less transactions mail.

Table 4.4:
Transactions Mail Received by Income and Age
(Pieces per Household per Week)

Household Income *(Thousands)*	Age of Head of Household			Average
	Under 35	35 to 54	Over 55	
Under $35	2.2	3.0	3.4	**3.0**
$35 to $65	3.0	4.7	4.9	**4.4**
$65 to $100	3.2	5.1	5.8	**5.0**
Over $100	3.5	5.4	6.7	**5.5**
Average	**2.9**	**4.6**	**4.8**	**4.3**

Source: HDS Diary Sample, FY 2012.

Table 4.5:
Transactions Mail Sent by Income and Age
(Pieces per Household per Week)

Household Income *(Thousands)*	Age of Head of Household			Average
	Under 35	35 to 54	Over 55	
Under $35	.6	.7	1.2	**.9**
$35 to $65	.6	1.3	1.7	**1.3**
$65 to $100	.8	1.2	1.6	**1.3**
Over $100	.3	1.0	1.8	**1.2**
Average	**.6**	**1.1**	**1.5**	**1.2**

Source: HDS Diary Sample, FY 2012.

Household Size

In terms of household size, Table 4.6 shows that the increase from a one-person household to a two-person household adds 1.6 pieces of transactions mail per week received and 0.3 pieces per week sent, but a larger household size has little effect on volume.

Table 4.6:
Transactions Mail Received and Sent by Household Size
(Pieces per Household per Week)

Household Size	Received	Sent
One person	2.9	1.1
Two	4.5	1.4
Three	4.7	1.2
Four	4.9	1.0
Five or more	4.8	.7
Average	**4.3**	**1.2**

Source: HDS Diary Sample, FY 2012.

For transactions mail received, Table 4.7 shows that one additional adult adds about 1.6 pieces (on average) of mail received per week. However, one additional adult generates only 0.1 pieces of additional mail sent.

Table 4.7:
Transactions Mail Received and Sent
by Number of Adults in Household
(Pieces per Household per Week)

Number of Adults in Household	Received	Sent
One	2.9	1.1
Two	4.5	1.2
Three or more	5.4	1.1
Average	**4.3**	**1.2**

Source: HDS Diary Sample, FY 2012.

Internet Access

Table 4.8 shows that households with Internet access (Broadband or Dial-up) receive more transactions mail than households without Internet service, even though having an Internet connection at home should make transactions more susceptible to electronic diversion. As shown in Table 4.9, this apparent contradiction is explained in large measure by the fact that household Internet access is strongly correlated with income and education.

Table 4.8 also shows that the number of transactions sent by households with Broadband is lower than both Dial-up users and households without any Internet access. Broadband's higher processing speeds provide a strong motivation for households to move financial transactions online or pay more for faster speeds, particularly when it relates to bill payments.

Table 4.8:
Transactions Mail Received and Sent by Internet Access
(Pieces per Household per Week)

Type of Internet Access	Received	Sent
Broadband	4.5	1.1
Dial-up	4.7	1.3
None	2.9	1.2
Average	**4.3**	**1.2**

Source: HDS Diary Sample, FY 2012.

Bill Payment

The total number of bills paid per month per household increased from 11.5 in 2010 to 12.1 in 2012. Households use a variety of methods to pay bills. Historically, they have been paid in person, via phone, or by mail. In the past decade, emerging technologies provided additional bill payment options. The most important of these is electronic bill payment, which, for purposes of this chapter, includes payments made via Internet, automatic deductions from bank accounts, and automatic charges to credit cards.

The Household Diary Study measures bill payment by all of these methods.

Table 4.10 shows the percentage of households that pay bills by each method and the average number of bills paid per month by each method. About 79 percent of households paid at least one bill by mail. Alternatively, this implies that 21 percent of households no longer paid any of their bills by mail. Other popular bill payment methods were online (used by 65.4 percent of households) and automatic deductions from bank accounts (57.1 percent of households). The average number of bills paid by mail per household was 4.8 per month, down 11 percent from 54 in 2010. In 2012, only 40 percent of all household payments were made by mail—the lowest share to date.

In 2012, households reported paying more monthly bills electronically (6.7) than by mail (4.8). Additionally, regarding total electronic payments, more payments were made online (4.3) than by all other electronic methods combined (2.5).

In 2012, households reported paying more bills electronically than by mail.

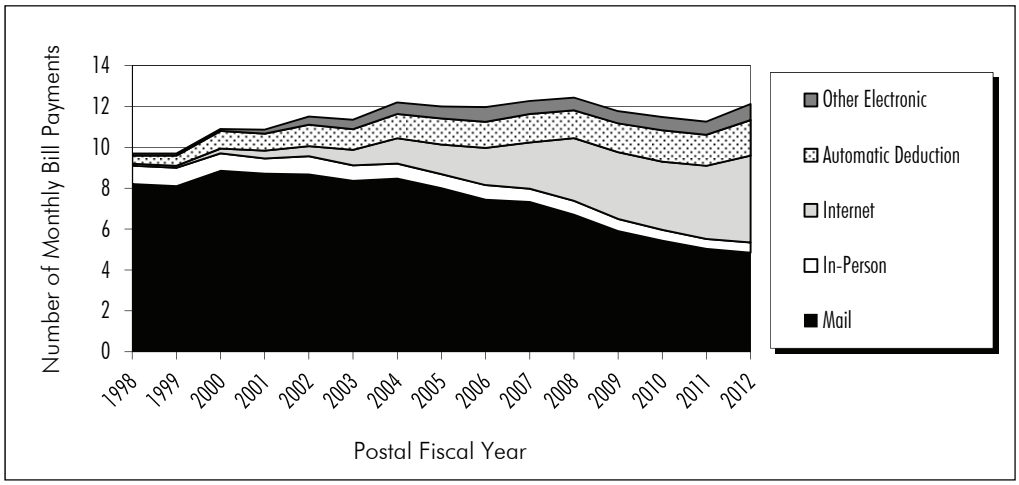

Table 4.10:
Bill Payment by Method, FY 2010, 2011, and 2012

Bill Payment Method	2010	2011	2012		
	Average Number of Bills Paid per Month	Average Number of Bills Paid per Month	Average Number of Bills Paid per Month	Share of Bills Paid	Percent of Households Using Method
Mail	5.4	5.0	4.8	39.9%	79.0%
Automatic Deduction	1.5	1.5	1.7	14.3%	57.1%
Internet	3.3	3.6	4.3	35.1%	65.4%
In-person	.5	.5	.5	4.2%	26.1%
Credit Card	.4	.4	.5	3.9%	21.8%

Total	**11.5**	**11.3**	**12.1**	**100.0%**	**—**

Source: HDS Diary Sample, FY 2010, 2011, and 2012.
Historical data for payments by mail was restated as a result of improved 2011 survey questionnaires which restated previously unclassified mail pieces.

As Figure 4.1 shows, electronic methods account for a growing share of household bill payments over time. In fact, since 2000, the average number of bills paid by electronic methods more than quadrupled, largely at the expense of the mail, which fell about 45 percent during that time.

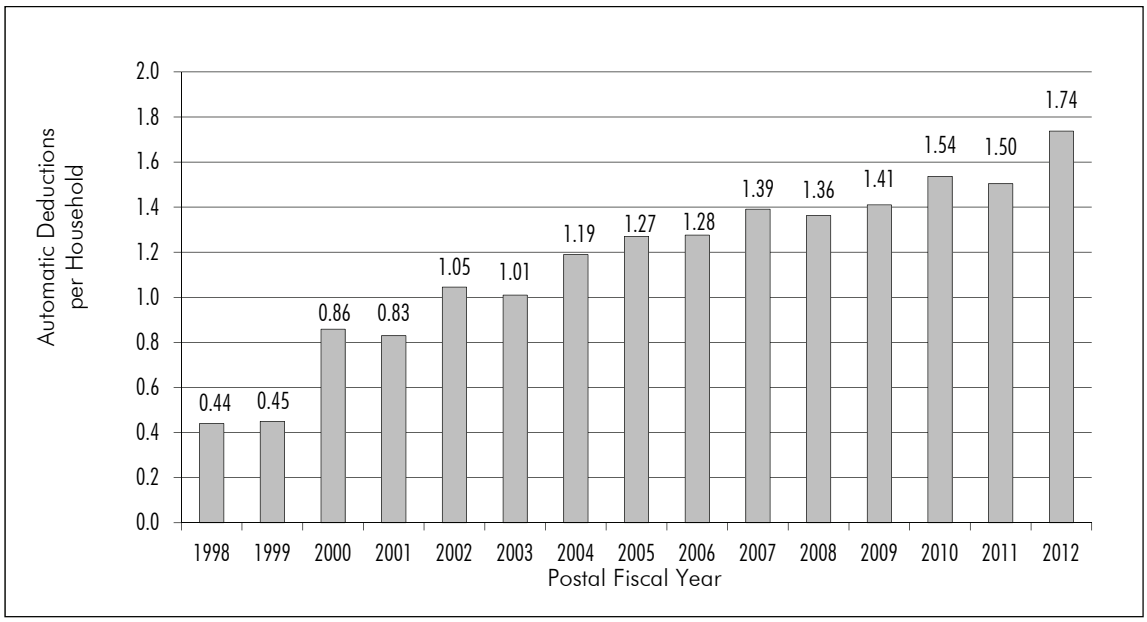

Figure 4.1:
Monthly Average Household Bill Payment by Method

Source: HDS Diary Sample, FY 1998-2012.
Note: Other Electronic includes telephone.

Figure 4.2 shows that automatic deductions more than tripled since 1998. Over time, however, the increasing affordability and popularity of Broadband has provided sufficient motivation for many households to transition from automated deductions to online bill payments, in a way similar to the electronic diversion of payments by mail. As a result, automatic deductions have leveled off in recent years.

Figure 4.2:
Average Monthly Automatic Deductions per Household

Source: HDS Diary Sample, FY 1998-2012.

The types of bills paid by mail are shown in Table 4.11. All types of bills that are paid by mail have been affected by electronic diversion. For each bill type, the share that is paid by mail decreased substantially from 2010. The share of electric bills paid by mail was the largest. In 2012, 46 percent of households paid their electric bills by mail, down from 50 percent in 2010. Similarly, the share of telephone bills paid by mail decreased from 48 percent in 2010 to 44 percent in 2012. All remaining bill types experienced similar declines in the shares paid by mail, leaving them with less than a 50 percent share paid by mail.

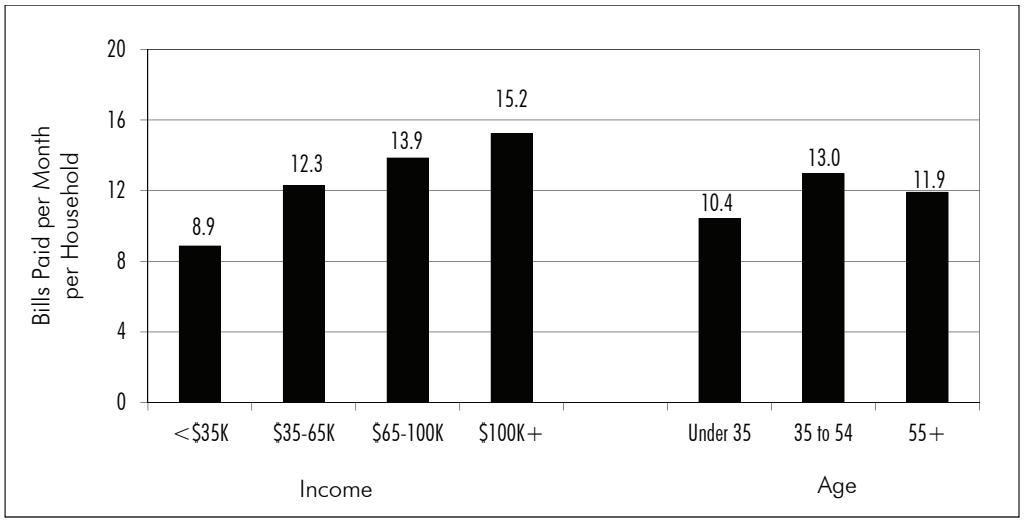

The Household Diary Study finds that the number of total bills paid per month varies by age and income, as does the choice of method used for bill payment. Figure 4.3 shows the total average number of bills paid per month for each income and age group.

Table 4.11:
Types of Bills Paid by Mail

Bill Type	Percent of Household		
	2010	2011	2012
Electric	50%	47%	46%
Telephone	48%	43%	44%
Credit Cards	42%	40%	38%

Other Loans	16%	16%	15%
Alimony/ Child Support	1%	1%	1%

Source: HDS Recruitment Sample, FY 2010, 2011, and 2012.

Figure 4.3:
Average Bills Paid per Month by Income and Age

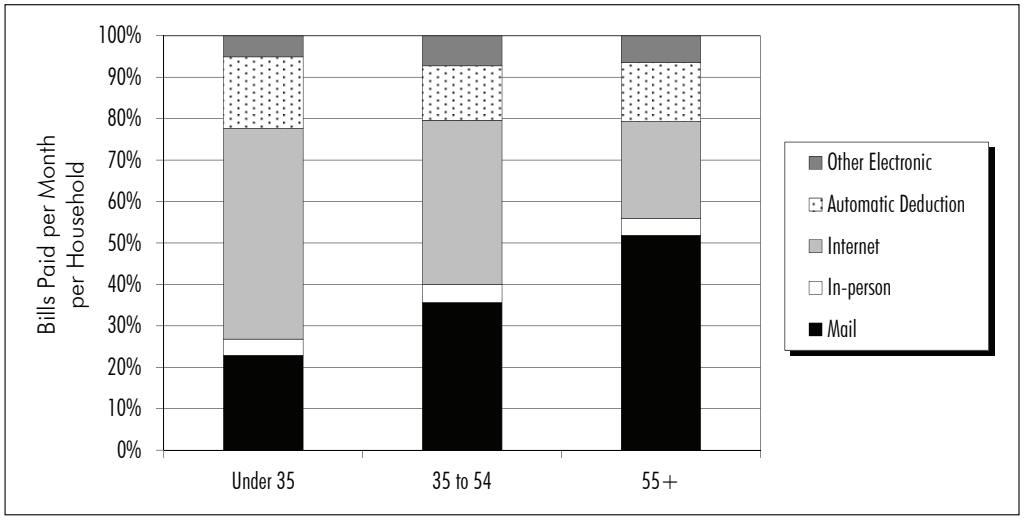

Source: HDS Diary Sample, FY 2012.

Unsurprisingly, the number of bills paid per month is positively related to household income. Households with incomes above $100,000 paid an average of 15.2 bills per month in FY 2012, compared to 8.9 bills paid by households with incomes below $35,000.

Age has a slightly different relationship with bill payment levels; younger households (in which the head of household is aged 34 or younger) and older households (in which the head of household is aged 55 or older) pay fewer bills than households in which the head of household is between the ages of 35 and 54.

Younger households pay the majority of their bills electronically. Figure 4.4 shows that the younger the head of a household is the more likely the household will pay bills electronically. Even when comparing just the Internet portion of total electronic payments to mail payments, younger households paid a greater share of bills online than by mail. Younger households paid only 23 percent of their bills by mail and 51 percent online, as compared to older households, who paid 52 percent of their bills by mail and only about 23 percent online.

Figure 4.4:
Bill Payment Method by Age

Source: HDS Diary Sample, FY 2012.
Note: Other Electronic includes telephone.

Bills and Statements Received

Table 4.12 shows the overall volume of bills and statements received. In FY 2012, about 43 percent of First-Class Mail received by households was bills and statements. Households received 14.1 billion bills in FY 2012, a 13 percent decline from 2010 (16.1 billion), partly because of account closures associated with the recession and increasing account consolidations. The largest volumes of bills originated from credit card companies (3.9 billion), utilities (2.2 billion), telephone/cable companies (2.2 billion), medical and professional companies (1.6 billion), and insurance companies (1.4 billion).

Statements received were predominantly sent by the financial sector, including banks, insurance companies, and other financial institutions.

As with bills, the volume of statements households received fell to 5.6 billion from 6.4 billion pieces in 2010, a decrease of 12 percent. In addition to account closures, statements also declined as financial institutions, in an effort to reduce costs, continued to move from monthly to quarterly statement mailings.

Table 4.12:
Bill and Statement Volumes by Industry

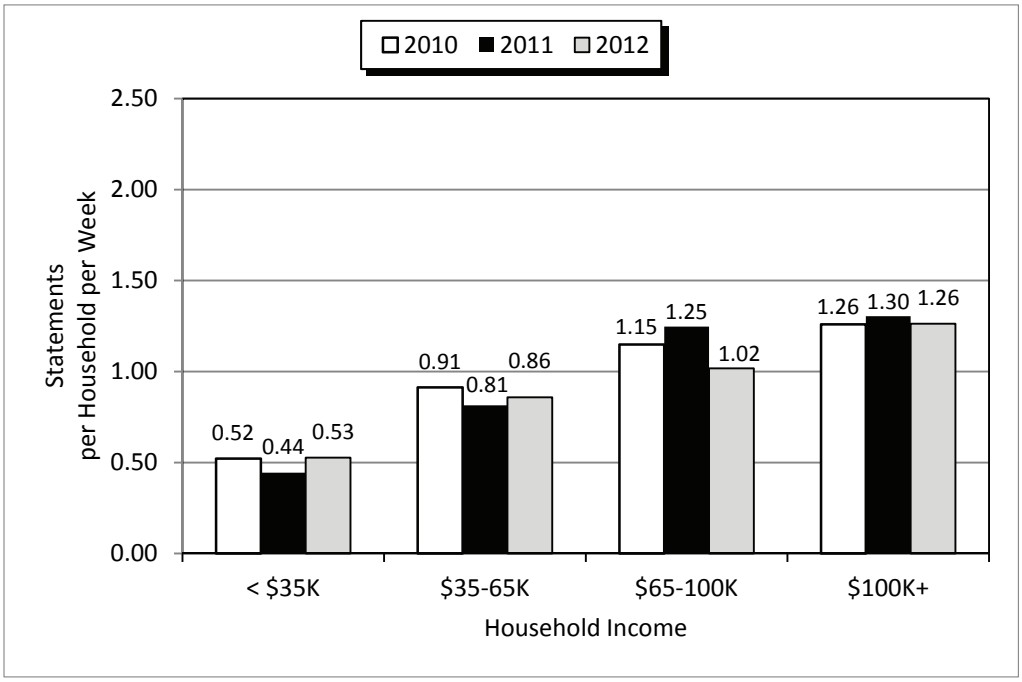

Industry	Volumes

Source: HDS Diary Sample, FY 2012.

As shown in Figure 4.5, between 2010 and 2012, the total number of statements received by mail decreased mostly in the middle household income categories.

Table 4.13 shows the average volume of bills and statements received by mail and online. For reasons described earlier, the number of bills and statements households received through the mail decreased 13.5 percent, on a per household basis, compared to 2010. The number of bills and statements received via Internet, on the other hand, increased by 8 percent.

Chapter 5: Advertising Mail

Introduction

This chapter examines advertising mail, which is any advertising, promotional, or sales material sent through the Postal Service. Advertising mail can be sent as First-Class or Standard Mail.

The Advertising Market

According to Magna Advertising Group, American businesses spent about $176 billion in 2012 advertising their products and services, which represents a 2.6 percent increase following a 1.7 percent spending increase in 2011. Of this total advertising spending, 11 percent was spent on direct mail (note that Magna's spending estimates for direct mail include only postage costs).

As in prior years, direct mail was one of the leading media choices of advertisers in 2012. However, the weak economic recovery led to only a small increase in total advertising spending. A large increase in Internet advertising left fewer funds available for more traditional advertising methods such as direct mail. As shown in Table 5.1, direct mail spending declined 5.9 percent compared to 2011; Internet advertising, on the other hand, increased 14.4 percent, by far the strongest spending growth compared to all other media categories.

Table 5.1:
U.S. Advertising Spending Growth by Medium, 2010-2012
(Percent Growth from Prior Year)

Medium	2010	2011	2012
Direct Mail	3.8%	-0.9%	-5.9%
Newspapers	-8.2%	-9.2%	-6.5%
Television	12.4%	1.3%	7.2%
Radio	4.8%	-0.5%	0.6%
Magazines	0.1%	-0.5%	-6.8%
Internet	14.9%	21.9%	14.4%
All Other	-12.3%	-8.8%	-8.4%
Total	4.5%	1.7%	2.6%

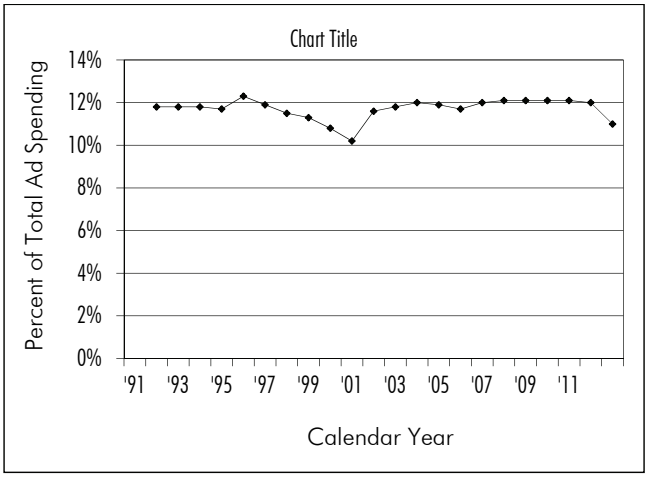

Source: Magna Advertising Group—estimates.
Note: Totals may not sum due to rounding.

Direct mail continues to be one of the most popular advertising choices. It is a highly efficient and versatile method for communicating with consumers. Direct mail can be targeted to the interests of individual customers, and used both to locate new customers and maintain relationships with existing customers. Direct mail allows for a variety of different types of advertising: letters, postcards, catalogs, and free samples. It can be sent as First-Class or Standard Mail, allowing advertisers to trade off expeditious, personalized First-Class mailings against cost-savings from Standard Mail.

Importantly, the effectiveness of direct mail is readily measurable, more so than for most other media. Businesses can track the response rate to a mailing far more precisely than for a television commercial or magazine advertisement. This feature alone gives advertising mail a key advantage over other media.

Figure 5.1 shows that, according to Magna's estimate of postage costs, direct mail's share of total advertising spending has remained relatively constant at 12 percent for most of the past 20 years. Direct mail has maintained its strong ad share, even with the introduction of new and fast-growing ad markets such as the Internet.

Figure 5.1:
Direct Mail as a Share of Total Advertising, 1991-2012

Source: U.S. Postal Service calculations based on Magna Advertising Group data.

Advertising Mail Volumes

In 2012, advertising mail represented 60 percent of all household mail. Households received 79.6 billion pieces of advertising mail, 6.5 percent less than in 2011.

As shown in Table 5.2, First-Class advertising mail accounts for 11.0 billion pieces (13.8 percent of all advertising mail received by households). Of this volume, 4.9 billion pieces are advertising-only, while the other 6.1 billion pieces are secondary advertising pieces. These pieces, also referred to as advertising-enclosed mail, are typically included in the volume totals of the primary piece, be it a bill, statement, or correspondence mailing.

In 2012, First-Class advertising-only mail declined almost 13 percent from 2011, continuing a downward trend that began in 2007, just prior to the last recession. Weak economic conditions that followed encouraged mailers to rely more heavily on Standard Mail advertising, a less costly alternative to First-Class Mail.

Advertising mail represented 60 percent of all mail received by households in 2012.

About 86 percent (68.5 billion pieces) of all advertising mail received by households in 2012 was sent via Standard Mail. This represents a 5.4 percent decrease compared to 2011, mostly due to a weak economy.

Prior to the last recession, direct mail advertising experienced a trend of strong, continuous growth, as there had been only one postal rate increase in over five years and spending was growing along with a stronger overall economy.

Standard Mail accounts for 86 percent of total household advertising mail.

Table 5.2: Advertising Mail by Mail Classification
(Volume in Billions of Pieces)

Mail Classification	Volume *(Billions of Pieces)*			Growth, 2010-2012
	2010	2011	2012

Advertising Mail and Household Characteristics

Income, Education, and Age

As advertising mail is used to sell goods and services, it is not surprising that the amount of ad mail received by a household is closely tied to income and education.

The relationship between advertising mail and household income is quite strong, as seen in Table 5.4. Households with incomes of $100,000 or more receive more than double the mail pieces received by households with income of less than $35,000 (19.2 pieces per week compared to 8.1).

Table 5.4 also shows that education plays a key role in the amount of advertising mail households receive. For example, households headed by someone without a high school degree receive 9.8 pieces per week while households headed by a college graduate receive 15.2 pieces per week (higher income households without a high school diploma likely represent successful entrepreneurs who receive large volumes of business-related ad mail).

The role that education plays in advertising mail is two-fold. First, direct mail is a written type of communication, and education may play some role in its relative effectiveness compared to television or radio advertising. Second, education is not only tied to current household income, but also to future household income. A college graduate who currently has a relatively low income may, in a few years, earn a much higher income.

Table 5.4: Advertising Mail Received by Income and Education
(Pieces per Household per Week)

Household Income *(Thousands)*	Education of Head of Household				Average
	Less than High School	High School graduate	Some College or Technical School	College graduate	
Under $35	8.0	8.1	8.0	8.8	**8.1**
$35 to $65	11.8	11.5	11.2	11.8	**11.5**
$65 to $100	17.2	13.7	14.0	15.0	**14.5**
Over $100	40.2	17.0	16.4	20.1	**19.2**
Average	**9.8**	**11.3**	**11.6**	**15.3**	**12.6**

Source: HDS Diary Sample, FY 2012.

Table 5.5 shows that households headed by older people receive more advertising mail than those headed by younger people. For every income group, advertising mail received increases as the age of the head of the household increases. In part, this is because age is correlated with other characteristics such as marriage, home ownership, and the presence of children in the household.

Moreover, the older a person is, the longer his or her buying history and the more businesses with which the person has a relationship that advertising mail can help maintain. Those households with incomes greater than $100,000 and with a head of household aged 55 and older received the greatest number of advertising mail pieces at 22.9 pieces per week.

The amount of advertising mail received increases as income, education, and household size increases.

Table 5.5:
Advertising Mail Received by Income and Age
(Pieces per Household per Week)

Household Income *(Thousands)*	Age of Head of Household			Average
	Under 34	35 to 54	Over 55	
Under $35	5.4	6.8	10.1	**8.2**
$35 to $65	7.7	10.5	14.7	**11.5**
$65 to $100	11.8	13.6	17.5	**14.5**
Over $100	13.9	18.3	22.9	**19.1**
Average	**8.5**	**12.7**	**14.8**	**12.6**

Source: HDS Diary Sample, FY 2012.

Household Size

Tables 5.6 and 5.7 show advertising mail received increases as the household size and number of adults in the household increase. While this is evident in looking at changes in household sizes from one to two household members (with a 40 percent increase in mail pieces) the greatest change in the number of pieces of advertising mail received is seen in the number of adults in the households.

As shown in Table 5.7, households with three or more adults receive 52 percent more advertising mail than a household with only one adult. This represents an increase from an average of 9.4 pieces per week to 14.3 pieces per week. Note, however, that most of this increase occurs when the number of adults increases from one to two, indicating a strong impact stemming from the likelihood of it being a two-income household.

Table 5.6:
Advertising Mail Received by Size of Household
(Pieces per Household per Week)

(Pieces per Household per Week)

Number of Adults	
One	9.4
Two	13.4
Three or more	14.3
Average	**12.6**

Source: HDS Diary Sample, FY 2012.

Internet Access

Finally, Table 5.8 shows the relationship between advertising mail received and Internet access. Despite all the attention paid to online and e-mail advertising, households with Internet access receive more advertising mail than those without access.

To a large degree, this reflects other household characteristics; as shown in Table 5.9, Internet access is closely tied to income and education. However, advertising mail is sent even when new advertising media are available. In addition, Table 5.8 may demonstrate the use of Internet information to target potential customers through direct mail advertising. Conversely, direct mail is often used as a complement to the Internet by directing potential customers to specific company websites.

Table 5.8:

Senders of Advertising Mail

Figure 5.2 provides data on the senders of advertising mail to households. Merchants continue to be the largest senders; in 2012, they sent 36 percent of Standard advertising mail and 19 percent of First-Class advertising mail. Financial firms are the second largest sender of Standard Mail advertising (24 percent) and (along with the service sector) the largest sender of First-Class advertising (37 percent).

Figure 5.2:
Advertising Volumes for First-Class and Standard Mail Advertising by Sender Type

Source: HDS Diary Sample, FY 2012.
Base: First-Class and Standard Advertising Mail Pieces excluding Unsolicited Samples, Multiple Organizations, and Don't Know/No Industry given.

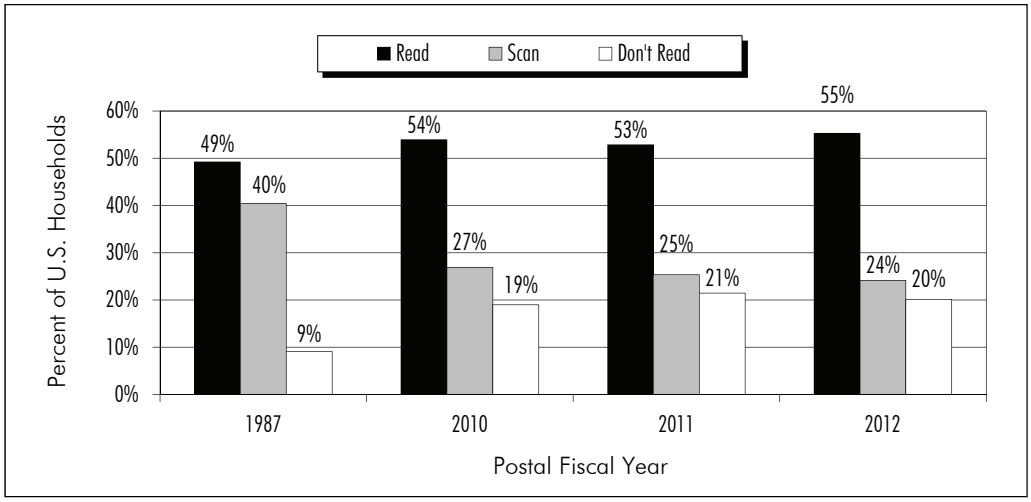

Attitudes toward Advertising

With $176 billion spent in the United States on advertising, few households would probably wish they received more.

Whether they wish to receive more or not, most households either read or at least scan their advertising mail. Figure 5.3 shows 55 percent of households usually read their advertising mail, while an additional 24 percent scan their mail. Only 20 percent of households report they do not usually read their advertising mail, an increase from the nine percent who did not usually read advertising mail in 1987. However, given the large increase in advertising mail volumes since then, it is clear that U.S. households read more advertising mail now than in the past.

Seventy nine percent of households either read or scan advertising mail sent to their household.

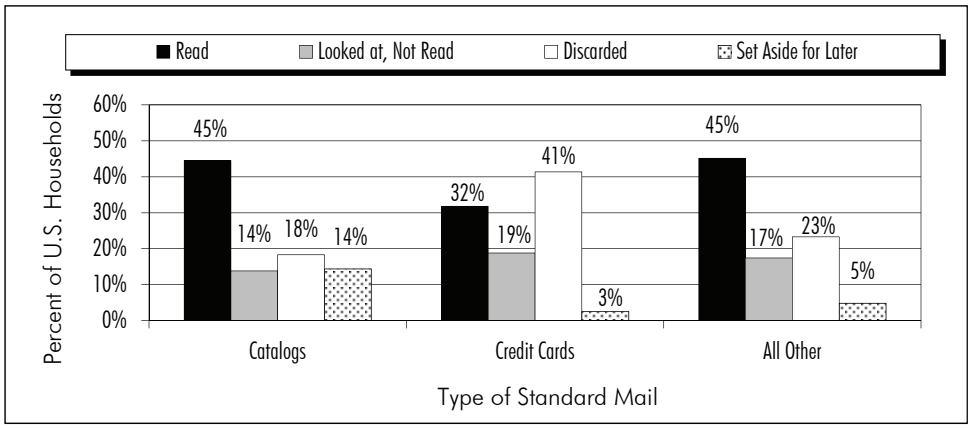

Figure 5.3:
Advertising Mail Behavioral Trends, FY 1987, 2010, 2011, and 2012

Source: HDS Recruitment Sample, FY 1987, 2010, 2011, and 2012.
Note: Percentages do not include those who did not provide a response.

Interestingly, the survey shows that not all advertising is treated equally. Figure 5.4 shows that catalogs attract more attention than credit card advertising, as they are usually more interesting to read. Forty-five percent of households read catalogs, and only 18 percent discard them without reading them. In contrast, 32 percent of households read credit card advertising, but 41 percent discard them without reading them.

Figure 5.4:
Treatment of Standard Mail by Type

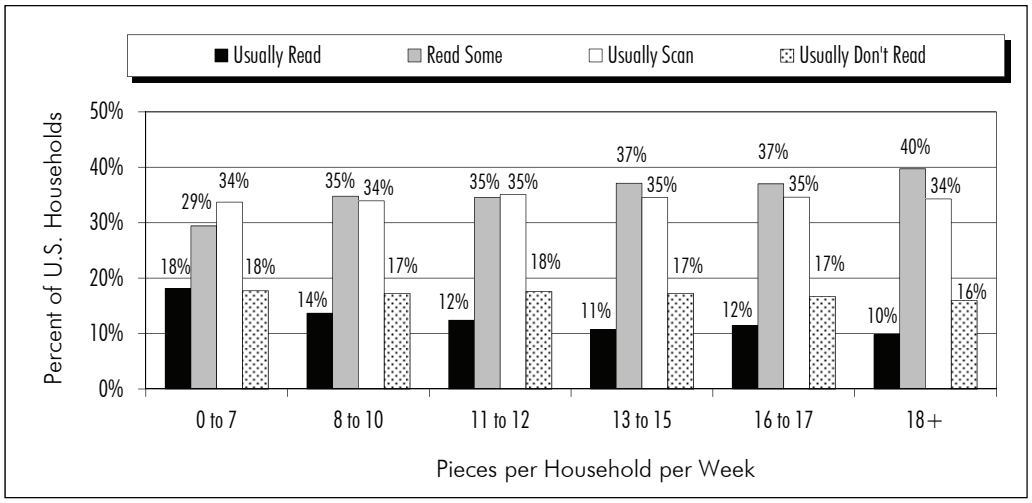

Source: HDS Diary Sample, FY 2012.
Note: Percentages do not include those who did not provide a response.

Another interesting result is found in Figure 5.5. Household behavior toward advertising mail is largely independent of how much advertising mail the household receives. For example, among households that receive zero to seven pieces of advertising mail per week, 47 percent usually read all or some of the mail, and 18 percent usually do not read any. Among households that receive eighteen or more pieces per week, 50 percent usually read all or some, and 16 percent usually do not read any.

Thus, households that receive more advertising mail than others do not appear to be particularly "turned off" by the high volume. However, Figure 5.5 also shows that, when looked at separately, the percentage of households that usually read all advertising does decrease as the number of pieces increases. When only seven or fewer pieces are received, 18 percent of households usually read all the advertising mail they receive. When 18 or more pieces are received, only 10 percent of households usually read all the advertising mail.

Figure 5.5:
Treatment of Standard Advertising Mail by Number of Standard Mail Pieces Received per Week

Source: HDS Diary Sample, FY 2012.

Effectiveness of Advertising Mail

Ultimately, advertisers send direct mail because it works—household members read and respond to it. Table 5.10 presents the intended response of households to advertising mail. Households report they intend to respond to about one in ten pieces of advertising mail, with the intended response to First-Class and Standard Mail advertising being 12 and 13 percent respectively. The table also shows that households say they may respond to another 19 percent of Standard advertising and 13 percent of First-Class advertising. This is not to say that a similar mail piece would receive a higher response rate if mailed via Standard Mail; it is more likely the result of a different mix of advertising in Standard Mail. For example, catalogs, which typically enjoy a high response rate, are routinely mailed Standard Mail but are infrequently mailed First-Class. Credit card advertising pieces, on the other hand, have the lowest response rate and are often mailed First-Class.

Figure 5.6 presents the total number of intended responses to advertising mail by income. As illustrated earlier in Tables 5.4 and 5.5, higher-income households received more advertising mail. Figure 5.6 combines the data on the amount of advertising mail received by household income with the household's intended response to the mail. The result is the average number of intended responses per week for each income level. For example, households with incomes greater than $150,000 report they intend to respond to 2.2 pieces of advertising mail per week, and they may respond to another 3.9 pieces per week. Other high-income households also indicated they will respond to more than one piece of advertising mail per week, as do some of the lower-income households.

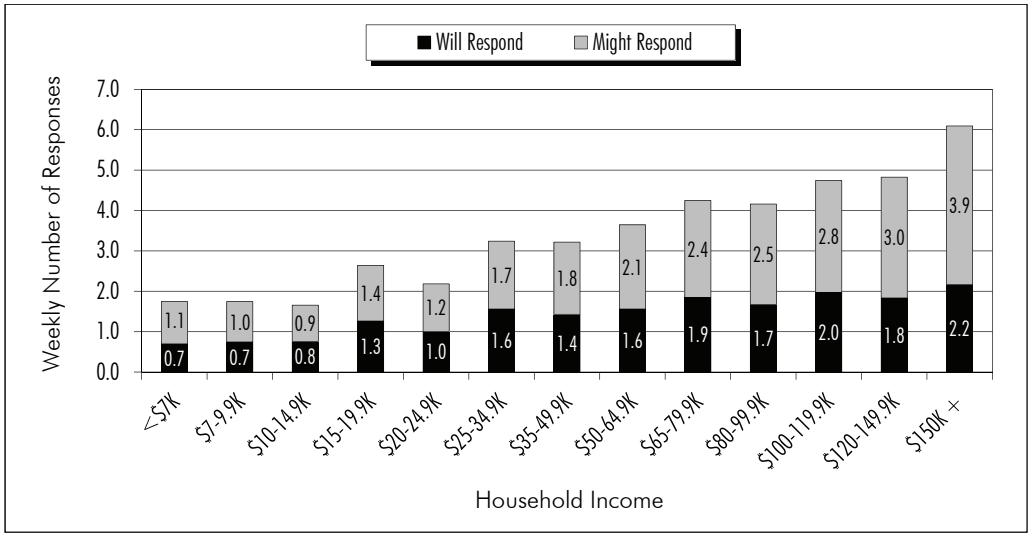

While intended responses do not always lead to actual responses, the data presented in Table 5.10 and Figure 5.6 help explain why direct mail is such a popular choice of advertisers in America. Although there is no completely equivalent measure for intended response to Internet ads, the click-through rate (the percentage of online visitors who viewed an ad and also clicked on it) is widely used as an indicator of consumers' interest in online ads. As such, it is somewhat comparable to mail ads' read rates. Based on published reports, the average click-through rate for Internet advertising is about 5 percent. Overall read rates for mail ads, on the other hand, have averaged about 50 percent.

Table 5.10: Intended Response to Advertising Mail by Class
(Percentage of Pieces)

Response	First-Class	Standard
Yes	12%	13%
Maybe	13%	19%
No	61%	66%

Chapter 6: Periodicals

Introduction

This chapter examines periodicals sent to households. Periodical Mail consists of newspapers or magazines regularly sent to households, usually as part of a subscription. This chapter analyzes only periodicals delivered by the Postal Service to households. Newspapers or magazines delivered by a local carrier or purchased at a newsstand or store are not included in Household Diary Study data. The volumes examined here are only a portion of the total periodicals volume, since some of periodicals are received by non-households, such as doctors' offices or other businesses.

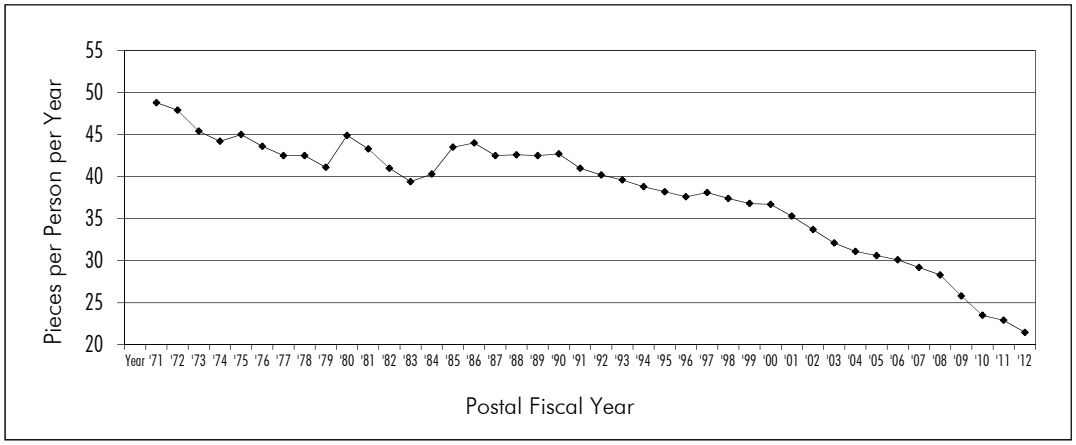

The Internet has become a strong substitute for hard-copy publications.

The Periodicals Market

Historically, Periodical Mail volume has not kept pace with population growth, as seen in Figure 6.1. Since the 1990s, as demographics changed, people began to read less than they did a few decades ago. Periodical volumes reached a peak in 1990 at 10.7 billion pieces, but have declined each year since then, with the exception of FY 2000. In that year, periodical volumes were temporarily buoyed by an influx of advertising revenue during the dot-com boom.

After the recession that began in 2001, periodicals volumes slipped not only because of reduced subscriptions, but also because of the number of publications that ceased operation as their sources of advertising revenue dried up. Since then, in addition to a general demographic shift away from reading, periodicals' volume continued to decline as the Internet became an increasingly accepted substitute for hard-copy publications. Since 2008, the decline was further aggravated by the impact of the severe recession and a weak recovery.

Figure 6.1:
Periodicals Mail Volume per Person, 1971-2012
(Annual Pieces per Person)

Advertising's Impact on Periodicals

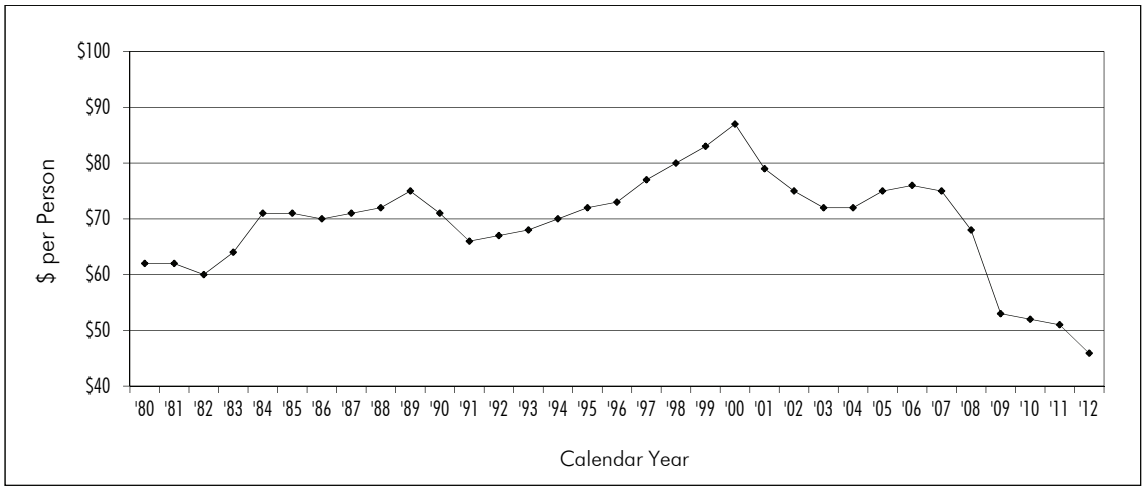

Advertising spending translates into advertising revenue, and the key determinant of periodicals profitability is advertising revenue.

Advertising is a form of business investment. As with other investments, when the economy takes a turn for the worse, advertising tends to slow. By 2000, total advertising as a percent of Gross Domestic Product (GDP) rose to a historically high level; when the high-tech bubble burst, advertising crashed. In 2002, albeit at a slower pace, total advertising spending resumed its growth, and, after six years of economic expansion, reached a new record high. After 2006, however, advertising spending suffered its largest decline in history and, by 2009, fell more than 20 percent. Since 2009, advertising spending increased 9.1 percent, aided by a slow economic recovery.

Magna Advertising Group projects that advertising spending will continue to grow. As the economy continues to recover, it typically would encourage advertising spending, which, in turn, should bode well for magazines. More magazines in circulation would translate into higher volume for the Postal Service, since, for most titles, the mail remains the primary distribution channel. The Internet, however, has become a strong competitor of hard-copy publications. The Internet provides an alternative channel for news, information, and entertainment. As a consequence, periodical volumes may be headed toward long-term decline, regardless of the state of the economy.

Figure 6.2 shows the sharp decline in real per capita advertising spending for magazines that started in 2001 due to the recession. Annual spending growth resumed in 2004 but only lasted two years. The recession, which started in 2007, sent magazine advertising plummeting to the lowest level in a decade, drastically shrinking the revenues and profitability of the magazine industry. Since 2009 spending decreased an additional 13.4 percent.

Figure 6.2:
Real Per-Capita Magazine Advertising Spending, 1980-2012

Source: Magna Advertising group, U.S. Census Bureau.

Household Periodicals Volume

As shown in Table E.2 of the Executive Summary, periodicals represent 3.9 percent of all household mail volumes. Table E.2 also shows that the volume of periodicals continued to decline over the past three years. In FY 2012, households received 5.1 billion periodicals, compared to 5.4 billion in FY 2011 and 5.5 in FY 2010.

Table 6.1 shows the breakdown of periodicals received by households. Seventy-five percent of all periodicals received by households were magazines. In contrast, in 1987, the share of magazines was 59 percent.

In 2012, households received an average of 0.6 magazines per week. The most common type of magazine is monthly, accounting for 67 percent of total magazines.

Newspapers make up 13 percent of total periodicals volume, down from a 35 percent share in 1987. The number of newspapers received per household each week declined from 0.6 in 1987 to only 0.1 in 2012, while magazines declined from 1.0 to 0.6 pieces per week.

The decline in newspapers captured in the Household Diary Study mirrors the behavior seen in overall newspaper circulation.

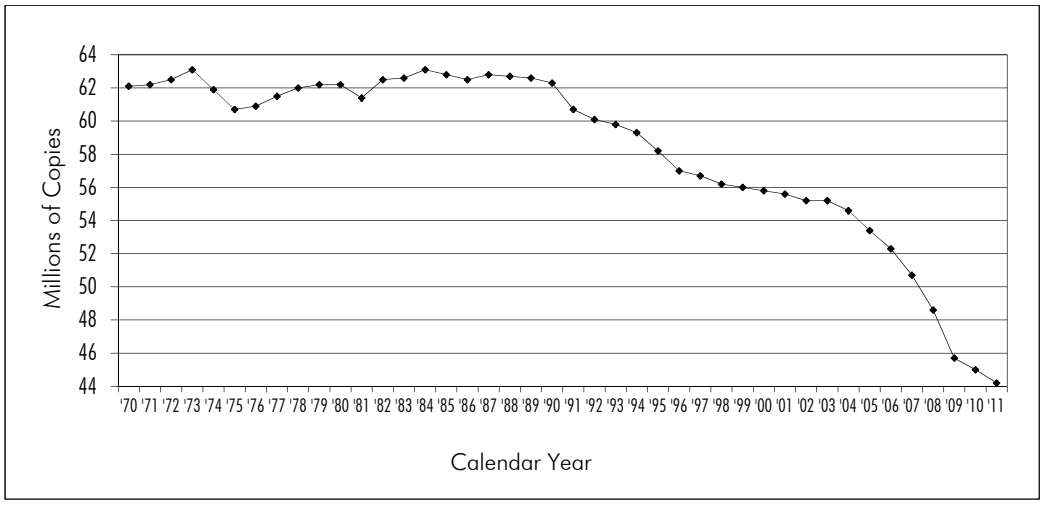

As shown in Figure 6.3, newspaper circulation in general has declined significantly since 1990. Of course, on a per capita basis, the decline is even more pronounced.

Source: Newspaper Association of America.
** Information is only available with a one year lag.*

Figure 6.4:
Daily Newspaper Readership, 1987-2012

Source: Newspaper Association of America.

Directly contributing to newspaper volume declines are changes in daily readership levels. As shown above in Figure 6.4, the percentage of the U.S. population reading newspapers on any given day decreased from 65 percent in 1987 to only 42 percent in 2012, after a slight increase in 2010.

Daily newspaper readership overall has declined significantly since 1987.

Declining newspaper readership and circulation are not the only contributors to the falling volume of newspapers received via mail by households. With current technology and alternate delivery systems, national newspapers, such as the *Wall Street Journal* and *The New York Times,* deliver their papers to prime urban and suburban household customers before breakfast. Local printing/ distribution and morning delivery mean these copies of these publications no longer move through the mail.

Periodicals Mail and Household Characteristics

Income, Education, and Age

Table 6.2 shows that as income and education increase, periodicals volume tends to increase. Households in which the head of the household has a college education receive the most periodicals, averaging 1.0 per week. Similarly, households with an income above $100,000 receive an average of 1.2 periodicals per week, almost three times what households earning less than $35,000 receive.

Households with incomes above $100,000 receive almost three times as many periodicals as households earning less than $35,000.

Table 6.3 shows periodicals volume by age and income. The higher the income and age of the household, the higher the volume of periodicals received. For households whose heads are under 34 years old and with incomes less than $35,000, the average is only 0.3 pieces per week. Households with income above $100,000 and whose heads are over 55 receive the most periodicals, with 1.4 pieces per week.

Table 6.2:

Household Size

Table 6.4 and Table 6.5 show that as households increase in size from one to two persons, periodicals volume increases. Households with more than two persons receive slightly fewer periodicals than two-person households. In households with two adults, periodicals volume is higher than in one-person households, but the presence of additional adults beyond two has no significant effect on receiving periodicals.

Internet Access

As with many other types of mail, wired households receive more periodicals through the mail, as shown in Table 6.6. And, as with those other types of mail, this is largely the result of the correlation between income, education, and Internet access (see Table 6.7). As households' access to the Internet and Broadband becomes more widespread, even more periodical content will be delivered electronically, rather than by mail. More recently, the emergence of e-readers may have contributed to the reduction in the number of periodicals moving through the mail.

Subscription Type

Figure 6.5 provides an overview of subscription type for FY 1987, FY 2011, and FY 2012. As shown, the distribution of subscription type has remained relatively stable over the last two years and similar to the 1987 distribution. In 2012, a household member ordered and paid for 45 percent of total periodicals sent to households. An additional 33 percent were free—either ordered by a household member or delivered to the household without a freestanding order, for example, as a prerogative of membership in a professional, fraternal, or religious organization.

Figure 6.5:
Subscription Type by Year

Source: HDS Diary Sample, FY 1987, 2011, and 2012.
Base: Total Periodicals Mail volume – RPW.
Note: Percentages do not add to 100 due to the exclusion of periodicals sent to non-households and those to which no response was given as to subscription type.

Examining these volumes by sender type shows that commercial organizations sent much more than any individual member organization. Member organizations are professional affiliations; charitable, religious, and veterans' organizations; educational groups; and unions. As shown in Table 6.8, member organizations, when combined, account for 17 percent of total periodicals received by households.

Table 6.8:
Periodicals by Sender Type

Sender Type	Pieces per Household per Week	Percent of Periodicals Received by HH
Commercial Organization	.67	83%
Professional Organization	.07	8%

Volume Drivers

A number of factors influence a household's receipt of periodicals. Several of these variables are demographic, while others are more behavioral in nature. In the past, income seemed to influence volume strongly, since periodicals are usually received through a paid subscription.

Typically, higher-income households subscribe to more magazines and newspapers. In 2012, the number of periodicals per household continued a long-term decline for the lower- and middle-income groups, but, more recently, it increased for the higher-income group, as shown in Figure 6.6

Figure 6.6:
Number of Periodicals Received per Week by Households by Income Group

Chapter 7: Packages

Introduction

This chapter discusses packages sent and received by households. Packages can be mailed via the U.S. Postal Service at a variety of rates; for example, documents are usually sent as First-Class Mail, Priority Mail, or Express Mail, while product samples are generally sent as Standard Mail.

The Package Market

The package delivery market is an important segment of the economy. As Table 7.1 shows, after falling 6.8 percent from 2007 to 2009, total volume increased 7.3 percent from 2009 to 2012. Over that time, however, the segments of the market performed differently.

There are three major segments of the package market:

- Overnight air,
- Two- and three-day air, and
- Ground.

The U.S. Postal Service is a major player in the two- and three-day air segment but provides services in all: Express Mail in the overnight segment, Priority and First-Class Mail in the two- and three-day segment, and Standard Mail and Package Services in the ground segment.

Between the early 1980s and 2000, the overall market grew, driven by growth in the overnight and in the two-day and three-day air segments. This growth was largely because of the expansion of services offered by United Parcel Service (UPS) and Federal Express (FedEx). UPS began to push strongly into the overnight market, and both UPS and FedEx developed new two- and three-day offerings to compete with Priority Mail.

The 2001 recession led to declines in all segments of the package market, with the largest effect in the two- and three-day air segment as customers shifted to time-guaranteed ground service in the face of hard economic times. The slow recovery in 2002 continued to adversely affect all segments of the package market, except for ground. Ground began to pick up in 2002 at the expense of the other segments. This pattern continued through 2004, further increasing the ground segment's share of the total package market.(see Figure 7.1 on the next page for recent shares by segment)). In 2005 and 2006, the recovering economy and the emergence of e-commerce boosted all segments of the package market.

As shown in Table 7.1, between 2007 and 2010, the instability of fuel prices and the recession that followed contributed to decreases in all markets. The overnight market was hit particularly hard during the recession. From 2007 to 2010 overnight volume declined 21 percent and remained relatively unchanged through 2012. The two/three-day and ground market segments, however, improved significantly since 2010, growing 8.1 and 8.4 percent respectively.

In 2012, package volume increased 2.8 percent to 11.1 billion pieces.

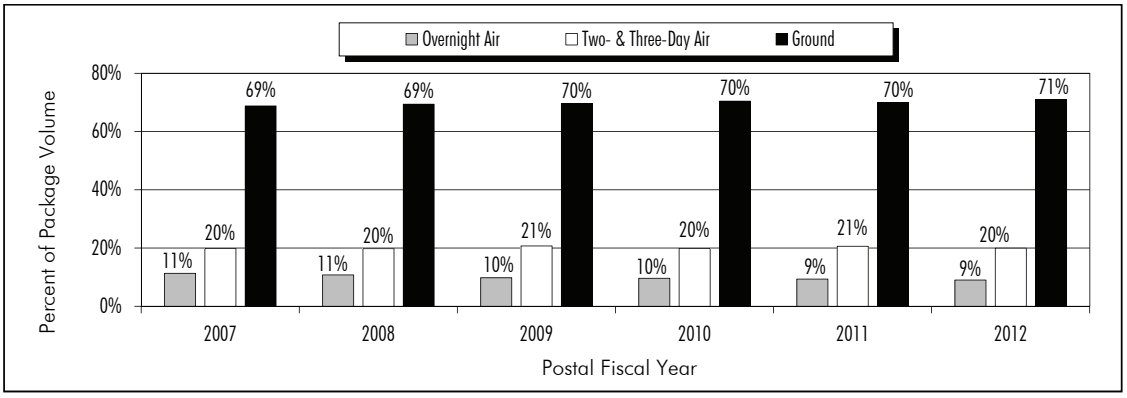

While many carriers serve the package delivery market, FedEx, UPS, and the U.S. Postal Service are the largest players.

Table 7.1:
Total Package Market Volume Growth
(Units in Millions)

Postal Service Package Volume

Compared to other mail, like letters and flats, the number of packages captured in the Household Diary Study is small, as most people do not receive packages on a regular basis. The interpretation of the results should be conducted with this in mind.

Postal Service package volume sent and received by households decreased seventeen percent from FY 2011 and 2012, driven by a fifty two percent decline in CD/DVD rentals. Excluding the rentals, packages increased seven percent.

Households received 2.8 billion packages in FY 2012 and sent 0.5 billion, as seen in Table 7.2. When First-Class Packages, excluding CD/DVD rentals, are compared to FY 2010, total sent and received by households increased 32 in FY 2012. CD/DVD rentals decreased 46 percent compared to 2010, as many rental customers converted to online streaming of movies. Standard Mail packages fell 17 percent compared to 2010 due to reclassifications of certain types of packages to Package and Shipping Sevices.

Source: HDS Diary Sample, FY 2010, 2011, and 2012.
Notes: First-Class Packages include 0.8 billion pieces of CD/DVD rentals sent and received reported in First-Class Mail letters in Tables E.1, 1.5,and 1.6.
Percentages may not sum to 100 due to rounding.
Totals include approximately 300 million pieces of household-to-household packages that are counted in both sent and received.

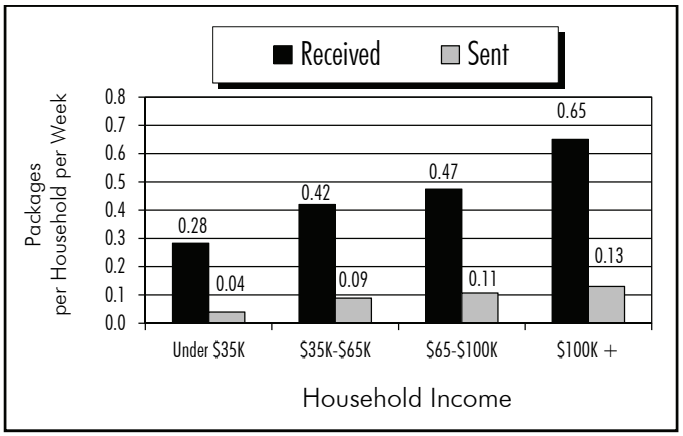

Packages and Household Characteristics

Income, Education, and Age

According to the HDS, high-income households sent and received more packages than their less affluent counterparts in FY 2012, as shown in Figure 7.2.

In fact, households in the highest income bracket received more than two times the number of packages received by households with incomes below $35,000. The highest income households also sent over three times as many packages as the lowest income households. For the two higher income categories, households headed by younger people on average received more packages than those with heads of household over 55 years old, as shown in Table 7.3. This may be the case because young heads of households make more online purchases than those who are older. When it comes to sending packages, Table 7.4 shows younger households, in all cases, again sent more packages than the older household group.

Figure 7.2:

The Household Diary Study indicates that households whose heads have college degrees tend to receive and send more packages on average than households with lower educational attainment. These results are shown in Tables 7.5 and 7.6.

Table 7.5:
Postal Service Received Packages by Income and Education
(Pieces per Household per Week)

One	.31	.07
Two	.46	.10
Three or more	.52	.07
Average	**.43**	**.09**

Source: HDS Diary Sample, FY 2012.

Internet Access

Access to the Internet seems to play an important part in determining the number of packages sent and received by households. Table 7.9 shows the packages sent and received by households with and without Internet access. In FY 2012, households with Broadband sent five times and received over two times as many packages as households without Internet access. These relationships probably reflect the correlation between income, education, and Internet access, as shown in Table 7.10.

In FY 2012, households with Internet access sent and received more packages than households without Internet access.

Table 7.9:
Received and Sent Packages

Type of Internet Access	Median Income	% w/ College Degree
Broadband	62,964	42%
Dial-up	41,761	26%
None	21,529	11%

Household Package Contents

As shown in Table 7.11, packages received by households most often contain music/videos, pharmaceuticals, books, and clothes—a sign that *online purchases and mail-order retail are the* primary drivers of household package volume.

In fact, online purchases contributed to a significant growth in music/video contents received. Although lower than in 2011, the share of this type of content remained strong in 2012, at 24 percent of all contents, primarily because of volumes generated by video rental outfits like Netflix.

Households most often send music and videos, clothes, books, and toys. Primarily, this is due to the higher volume of household packages sent during the holiday season, but it may also be evidence of the growing use of online sales and auction portals, such as eBay.

Table 7.11:
Contents of Postal Service Sent and Received Packages

Source: HDS Diary Sample, FY 2010, 2011, and 2012.
Notes:
Contents questions are multiple response; total packages does not include multiple contents and, as such, does not equal the sum for each column.
Does not include contents for which no answer was given (DK/RF).
Music/Video packages include 0.8 billion pieces of CD/DVD rentals sent and received, reported in First-Class Mail letters in Tables E.1, 1.5, and 1.6

Appendix A: Comparative Tables 1987, 2011 & 2012

Concordance of Tables

This Concordance of Tables that follows provides detailed estimates concerning mail piece attributes, household mailing behavior and mean pieces per household per week for a variety of demographic characteristics.

The reporting of data in these tables was done using prior year definitions of key measures to maintain consistency. For this reason, these data may differ from that reported in tables in the report text. Where possible, we have provided information about the calculations (such as the "base") or other supplemental notes so that readers can interpret the findings appropriately.

Comparisons between 1987 and years after 2009 data should be done with caution. Data after 2009 represent refinements in survey methodology from previous years, as well as modifications in the procedures for weighting and adjustment for mail flow underreports. These data may also reflect changes in the definitions of mail classifications.

Concordance of Appendix Tables

Business Transactions -- In Response to Advertising:						
Total Response to Advertising	3.6	1.0	0.9	0.6	0.1	0.1
Business Transactions -- Not in Response to Advertising:						
Transaction to phone/utility company	2.0	3.0	3.3	0.4	0.4	0.4
Transaction to credit card company	1.5	1.9	2.1	0.3	0.2	0.2
All other business mail	5.1	7.3	6.5	0.9	0.9	0.7
Total Business Not In Response to Advertising	8.6	12.2	12.0	1.5	1.5	1.3
Don't know / No answer	0.1	0.2	0.1	0.0	0.0	0.0
Total Mail Sent by Households to Nonhouseholds	12.2	13.4	13.0	2.1	1.6	1.4

Note: Totals may not sum due to rounding.

Table A2-29
First-Class Mail Originating in Households and Nonhouseholds
Postal Fiscal Years 1987, 2011 and 2012
(Diary Data)

Sector	Percentage of First-Class Mail			Pieces Per Household Per Week		
	1987	2011	2012	1987	2011	2012
Household-to-household	9.1	5.9	6.2	1.6	0.7	0.7
Household-to-nonhousehold	12.2	13.4	13.0	2.1	1.6	1.4
Nonhousehold-to-household	40.6	55.5	55.4	7.0	6.6	6.1
Unknown outgoing	1.9	1.9	1.3	0.3	0.2	0.1
Unknown incoming	0.6	3.3	3.8	0.1	0.4	0.4
Subtotal	64.4	80.1	79.6	11.1	9.6	8.8
Nonhousehold-to-nonhousehold	35.6	19.9	20.4	N/A	N/A	N/A
Total	100.0	100.0	100.0	N/A	N/A	N/A

Base: RPW Total, First-Class Letters & Cards.
Note: Totals may not sum due to rounding.

Table A2-30
First-Class Mail Media by Which Mail Order Purchases Made in the Past Month Were Ordered
(Percentage of Orders)
Postal Fiscal Years 1987, 2011 and 2012
(Recruitment Data)

Media	1987	2011	2012
Phone	31.0	22.1	13.4
Mail	67.2	19.6	50.9
Other	1.7	58.3	35.7
Total	100.0	100.0	100.0

Note: Totals may not sum due to rounding.

Note: Instead of each respondent getting a 1 for each type, summed the actual number of orders given.

Table A2-31
First-Class Mail -- Method of Bill Payment
Postal Fiscal Years 1987, 2011 and 2012
(Recruitment Data)

Method of Payment	1987	2011	2012
By mail	95.7	77.8	77.0
In person [1]	N/A	26.5	29.5
By automatic deduction from bank account	21.8	49.0	54.7
By personal computer [1]	N/A	53.4	63.1
By telephone	0.8	14.8	16.9
By automatic charge to credit card [1]	N/A	17.7	20.5

Number of Payments	1987	2011	2012
Total payments per household per month	9.14	10.88	9.67

[1] Due to the way questions were worded in the 1987 version of the Recruitment interview, information regarding percentages is unavailable from the data.

Note: Sum of Percentages exceed 100% due to households using more than one method of bill payment.

Table A2-38
First-Class Mail -- Use of Automatic Deductions
(Percent of Households)
Postal Fiscal Years 1987, 2011 and 2012
(Recruitment Data)

Deductions	1987	2011	2012
0	78.1	48.5	42.7
1	13.1	16.4	17.4

[1] Prior to 2007 Standard mail volumes were inflated by about 3 billion pieces due to a double count of Detached Address Labels in the Carrier Cost System (CCS). Also, volumes through 2007 were understated by about 2 to 3 billion pieces in the CCS. These CCS volumes are used as a control for survey results.

Appendix B: Methodology

Study Design and Methodology

The U.S. Postal Service Household Diary Study (HDS), conducted by NuStats on behalf of the Volume and Revenue Forecasting division of the Postal Service's Finance Department, is a continuously fielded study that measures household mail volumes, mail usage, and attitudes about the mail and advertising.

The HDS uses a two-stage survey design: Stage 1 is an interviewer-mediated household recruitment interview. Stage 2 is a self-completion mail diary [Appendix C contains the survey instruments]. The HDS uses a multi-mode approach to minimize response bias, to improve data accuracy through efficient data checking and household re-contacts, and to provide immediate telephone assistance to participants during their diary week.

Household Recruitment Interview

The **household recruitment interview** collects information on household and individual demographics, recall of mail sent and received, adoption and use of communications technologies, bill payment behavior, and attitudes towards advertising.

Mail Diary

The **mail diary** covers a seven-day period (Monday to Sunday) and collects information on the number of mail pieces received and sent, industry source, mail characteristics, and attitudes regarding mail received.

Sample Design

This section describes the household selection process for participation in the HDS. A sample is the representative subset of the survey population used to gain information about the entire population. The population of inference for the HDS is all U.S. households. The probability design ensures each household has an equal chance of selection.

The sample design allows projections of results to all U.S. households. The Postal Service provided an address sample that NuStats matched for known telephone listings. Generally, the study was conducted using telephone sampling for household selection and screening, followed by diaries mailed to eligible households and completed by each household unit. Households without telephones were contacted via U.S. Mail. The sample design involves a systematic sample stratified by strata (or urban/rural location) and Census regions, ensuring even coverage across the United States.

A master national sample was specified and drawn by in-house sampling statisticians. The Postal Service drew the household probability sample from the national address database following NuStats specifications. The master list, sorted by ZIP code, was used to draw a systematic stratified sample, which was then tagged with variables indicating each housing unit's geographic location in terms of Census region and stratum.

Sample was drawn for each of the four quarters based on known proportions of households within a Census region and urban or rural location. Census regions are defined by state. Urban and rural location is defined by county and metropolitan status as defined by the U.S. Census Bureau. The strata are defined by county as follows:

- **Stratum 1:** Counties that are part of the 30 largest metropolitan areas in the United States, as defined by population, according to 100 percent counts of the Census 2010.
- **Stratum 2:** Counties that are part of metropolitan areas but are not in Stratum 1.
- **Stratum 3:** Counties that are not part of a metropolitan area.

Quarterly sample frames were then derived based on the amount of sample needed for each quarter, and sample was allocated to region and strata cells based on known proportions as indicated by Census 2010 counts of households.

The sample was continuously "fielded" throughout all 52 weeks of the year. Sample was released in a manner designed to recruit equal sample sizes for each diary week, resulting in a sample file of at least 5,200 households. Table B.1 below shows the distribution of recruited and completed households.

Table B.1:
Sample by Postal Quarter

Quarter	Required Sample	Recruited Households	Completed Households
Quarter 1	1,300	2,015	1,290
Quarter 2	1,300	2,036	1,264
Quarter 3	1,300	1,946	1,161
Quarter 4	1,300	2,258	1,416
Total	**5,200**	**8,255**	**5,131**

Data Collection Method

The study uses a two-stage design in which households are recruited to participate in the diary study in a household interview (Stage 1) and recruited households complete a seven-day diary of mail received and sent (Stage 2).

Stage 1: Household Recruitment Interview

The main function of the household recruitment interview is to recruit households to participate in the diary study. In addition, the interview collects information on household and person demographics, recall of mail sent and received, adoption and use of communication technologies, bill payment behavior, and attitudes towards advertising.

Households completed the recruitment interview via computer-assisted telephone interviewing (CATI) technology. The FY 2012 household interview consisted of 8,255 completed interviews with an adult member (age 18 or older) in the household. These respondents represented a cross-section of U.S. households by geography. The household interview contained 130 data items and took an average of 25 minutes to administer. The flow of the interview included the following elements:

- **Introduction.** Each interview began with an introduction and purpose of the interview. The interviewer also verified the respondent's address.
- **Technology adoption and use.** Questions were asked about ownership and use of personal computers, Internet, and other electronic communication.
- **Mail volume recall.** The respondent was asked to summarize how many personal letters, greeting cards, electronic greeting cards, and packages all members of the household have sent in a particular time period.
- **Use of postal services.** The use of post offices, post office boxes, and private mailing services was explored.
- **Bill payments.** Bill payment volumes, methods, and timing were explored in depth.
- **Periodicals.** A summary of magazine and newspaper volumes received by the household were collected.
- **Advertising.** Descriptions of advertising received by the household as well as attitudes about the advertising, and orders placed because of it, were elicited.
- **Online shopping.** Respondents were asked about their online shopping habits, including questions about shipping methods.
- **Financial accounts and credit cards.** Respondents were asked to summarize the total accounts and credit cards held by the household.
- **Household and person demographics.** Demographic items included gender, age, marital status, employment status, educational attainment, race/ethnicity, household income, household wage earners, home ownership, residence tenure, and dwelling type.

The completion rate for the FY 2012 study (defined as the proportion of respondents who completed the diary portion relative to all recruited respondents) was 62.2 percent. This represents a decrease of 2.6 percent from 2011. Most recruitment refusals took place prior to hearing who NuStats was and why the firm was calling. Refusal households that were later re-contacted cited time constraints and privacy concerns as reasons for not participating.

Stage 2: Mail Diary Package

Recruited households were sent mail diaries, instructions, and a toll-free "help" telephone number. The night before the beginning of an assigned diary week, NuStats made reminder calls to households to confirm receipt of the diary package and to answer any questions. If the diary package was not received by this time, NuStats re-confirmed the address, assigned a new diary week, and re-sent the diary package.

The diary package contains a Certificate of Appreciation, Instruction Booklet, and a photo-based "Quick Start" sheet. The Instruction Booklet provided information about the study, answers to frequently asked questions, instructions for filling out the diary, guidelines for sorting mail, and examples of mail markings.

The diary instrument was composed of two parts:

- **The Question sheets.** The Question sheets are color-coded by mail classification (First-Class Mail received, First-Class Mail sent, Standard, Nonprofit, etc.). Information collected about each mail classification included: type of mail piece (i.e., envelope, postcard, catalog, etc.), receiver ZIP code, sender ZIP code, mail classification, mail type, sender type, information about advertising enclosed, and receiver reaction or responses to the mail piece.
- **Seven answer booklets, each specific to a day of the week.** Each booklet was arranged by mail classification and color-coded to correspond to the question sheets.

Households were instructed to enclose pertinent information from each mail piece received to enable NuStats editors to verify or clarify quantity and classes of mail recorded in the diaries. NuStats used a three-stage editing process to check the accuracy of the diary information recorded by each household. First, returned diary packages were culled for those that represented a reasonable attempt to complete the diary. Second, the diary information recorded for each day were checked to ensure sufficient and logical answers, as well as to verify recorded information against the mail markings returned in the package. The diaries were then scanned using Optical Character Recognition (OCR) software. In stage three, a verifier re-checked the diary information recorded in the OCR software for each day. This second edit functions as a quality control check to ensure data accuracy.

During the editing process, a small number of correction callbacks were made to households to clarify information or to fill-in missing information. Overall, about three percent of returned diaries did not pass the edit checking process.

Of the 8,255 households recruited to receive a diary package, 5,131 actually returned acceptable completed diaries (defined as containing data suitable for analysis) to NuStats, for a completion rate of 62.2 percent.

Data Processing

Data Management

Data management entails processing the information resulting from the Household Interview and Mail Diaries, making it available for analysis, storing it, and documenting it. Household interviews were conducted using CATI technology, where the questionnaire and relevant data checks were programmed into a master questionnaire that was used by all interviewers to administer the survey. Recorded data was extracted from the CATI software into a database management file.

Returned diary information was recorded (entered) through optical scanning technology. The diary data, once scanned using Teleform software, was captured in a database management file.

After completion of data collection, editing and entry tasks, the survey data were contained in 9 data files. One data file contained the Household Interview data. The Mail Diary data were in 8 files—one for each mail classification (First-Class Mail received, First-Class Mail sent, etc.). These files were all developed in SAS-PC.

The file variables were identified by variable name. For each file variable, the File Information contains:

- Label, which is a brief description of the variable;
- Measurement level, which specifies the level of measurement as scale (numeric data on an interval or ratio scale), ordinal, or nominal. Nominal and ordinal data can be either string (alphanumeric) or numeric;
- Value formats, which identify the response codes; and
- Column width and alignment.

Several SAS programming operations were necessary to put the Mail Diary data in the desired form for analysis. The structure for these programs was contained in a separate File Information document that accompanied the data delivery.

Various edit routines were used to check the consistency of the reported data and to identify reporting or entry errors. Routine edit checks were conducted to examine questionnaire responses for reasonableness and consistency across items. Routine checks included such items as:

- Response code range checks;
- Checks for proper data skips and patterns of answering questions consistent with prior answers;
- Checks for realistic responses (e.g., number of online purchases possible in one month); and
- Checks for high frequency of item non-response (missing data from question refusals).

When conducting these checks, data were compared against the actual survey forms. NuStats identified extreme values that were impossible or unlikely, and corrected inconsistent data when possible. For

example, extremely high numbers of computers owned by a household were examined to determine whether or not they were legitimate.

Some extreme/inconsistent data values unable to be corrected or verified were edited to missing values.

In addition, NuStats performed in-depth customized data checks to ensure data within each record of the Household Interview were logically consistent. For example, a respondent should have reported paying bills online only if he/she also reported having Internet access. Customized checks were also used to ensure consistency between the Household Interview and Mail Diary data. For example, an addressee was identified as a child (under 18) in the diary only if the household also reported having a child in the Household Interview.

Raw variables, derived variables, and analytical programs were documented in a data documentation binder that accompanied the data delivery. Any information that could be directly or indirectly used to identify individual respondents, such as respondent names, addresses, or telephone numbers, were removed to protect respondent confidentiality and privacy. Such information is stored in a locked archival file.

Sample Demographic Profile (All Counts Unweighted), Government Fiscal Year 2012

Table B.2:
Annual Household Income by Recruitment/Retrieval Status

Annual Household Income	Recruited Households		Total	Sample Percent	Population Percent
	Retrieved	Not Retrieved			
Under $10,000	141	257	398	3.2%	7.6%
$10,000 - $14,999	179	203	382	4.1%	5.9%
$15,000 - $19,999	218	194	412	4.9%	5.7%

Population percent based on U.S. Census Bureau, Current Population Survey Annual Demographic File (March 2012).

Data Weighting and Expansion

This section explains the methodology used for creating sampling and expansion weights for the FY 2012 Household Diary Study.

The FY 2012 HDS uses both weighting and expansion factors to 1) adjust the sample data to match population parameters and 2) expand mail volumes exhibited in the diary sample to all U.S. households.

Weighting Procedures, FY 2012 Recruitment Data

Sampling weights were produced separately for the households that participated in the recruitment phase of the FY 2012 HDS, and those that completed and returned a diary. There were two main weighting variables: Geography and Education. FY 2012 recruitment geographic weights were derived from sample households' strata and region:

Strata: As mentioned previously, there are three strata. A household was classified within strata as residing in the top 30 metropolitan areas nationwide, any other metropolitan area, or a non-metropolitan area.[1] Table B.8 provides unweighted sample counts from FY 2012 recruitment data for strata:

Table B.8:
HDS 2012 Recruitment Data: Urban/Rural Location

Urban/ Rural Location	Household	Percent	Cumulative Percent
30 Largest Metro Areas	4,099	49.7%	49.7%
Other Metro Areas	2,460	29.8%	79.5%
Non-Metro Counties	1,696	20.5%	100.0%
Total	**8,255**	**100.0%**	

Regions: Households were classified by state. There are four mutually exclusive regions as defined by the U.S. Census Bureau (along with respective states):

Four Census Regions:

Northeast: Connecticut, Maine, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, and Vermont.

Midwest: Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Ohio, South Dakota, and Wisconsin.

South: Alabama, Arkansas, Delaware, District of Columbia, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, Virginia, and West Virginia.

West: Arizona, Alaska, California, Colorado, Hawaii, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, and Wyoming.

Table B.9:
HDS 2012 Recruitment Data: Geographic Region

Geographic Region	Households	Percent	Cumulative Percent
Northeast	1,531	18.5%	18.5%
Midwest	1,890	22.9%	41.4%
South	3,072	37.2%	78.7%
West	1,762	21.3%	100.0%
Total	**8,255**	**100.0%**	

Strata/Regions: Table B.10 indicates the distribution of households from the FY 2012 recruitment sample within strata and regions.

Population parameters for the intersection of the three strata and four regions were based on 2010 Census counts of households by county. As Table B.10 shows, each county was grouped according to its location within these 12 mutually exclusive and collectively exhaustive geographic categories.

To calculate the weight for each strata/region interval, the population percentage was divided by the sample percentage. Geography weights appear in the last column to the right in Table B.11.

[1] Metropolitan area is defined within the sample according to the official definition used by the U.S. Census Bureau, commonly referred to as Metropolitan Statistical Areas (MSAs). Metropolitan areas are defined as single- or multi-county areas. Non-metropolitan areas are counties that do not belong to a metropolitan area. Each sample county was assigned to a stratum according to its metropolitan status.

Table B.10:
Distribution of Households within Strata and Region

Geographic Region	Stratum *(Urban/Rural Location)*			Total
	30 Largest Metro Areas	Other Metro Areas	Non-Metro Areas	
Northeast	1,096	275	160	**1,531**
Midwest	951	508	431	**1,890**
South	1,005	1,250	817	**3,072**
West	1,047	427	288	**1,762**
Total	**4,099**	**2,460**	**1,696**	**8,255**

Table B.11:
HDS 2012 Recruitment Data: Construction of Geographic Weight

Stratum	Geographic Region	Households *(Population)*	Percent	Households *(Sample)*	Percent	Weight
30 Largest Metro Areas	Northeast	8,679,534	7.96%	1,096	13.3%	.60
	Midwest	11,759,871	10.79%	951	11.5%	.94
	South	16,492,511	15.13%	1,005	12.2%	1.24
	West	13,800,893	12.66%	1,047	12.7%	1.00
Other Metro Areas	Northeast	7,316,645	6.71%	275	3.3%	2.02
	Midwest	9,982,770	9.16%	508	6.2%	1.49
	South	19,849,344	18.21%	1,250	15.1%	1.20
	West	9,074,069	8.33%	427	5.2%	1.61
Non-Metro Areas	Northeast	1,485,685	1.36%	160	1.9%	.70
	Midwest	3,551,875	3.26%	431	5.2%	.62
	South	5,200,840	4.77%	817	9.9%	.48
	West	1,796,099	1.65%	288	3.5%	.47
Totals		**108,990,136**	**100.0%**	**8,255**	**100.0%**	**1.00**

Source: Household Population Estimates based on U.S. Census Bureau, 2010 Census.

Education: In addition to weighting for differences in geography between the sample and the population, an additional weight was created based on differences in the educational attainment of the head of household. For those households in which either more than one person was identified as the head of household or no individual was identified as the head of household, one was chosen based on the following sequence of criteria: 1) oldest male or 2) oldest female (if no male exists). For cases in which two candidates for the head of the household were of the same age, the respondent on the phone was chosen.

Known population parameters were based on weighted proportions derived from the U.S. Census Bureau's Current Population Survey annual demographic file for March 2012. For cases in which the head of household refused to provide his/her education level, an educational level was imputed based on the average educational level of like cases. There were 23 such cases in 2012; mean levels of educational attainment were based on geography (strata and regions), as well as age and income level, if provided.

Table B.12:
HDS 2012 Recruitment Data: Construction of Educational Attainment Weight

Educational Attainment	Households *(Population)*	Percent	Households *(Sample)*	Percent	Weight
8th Grade or Less	5,211,870	4.3%	132	1.6%	2.69
Some high school	9,064,100	7.5%	370	4.5%	1.67
High school graduate	34,674,651	28.6%	2,015	24.4%	1.17
Some college	22,419,286	18.5%	1,591	19.3%	0.96
Technical school graduate	5,282,518	4.4%	468	5.7%	0.77
College graduate	30,787,154	25.4%	2,226	27.0%	0.94
Postgraduate work	13,634,627	11.3%	1,453	17.6%	0.64
Totals	**121,074,207**	**100.0%**	**8,255**	**100.0%**	**1.00**

Note: Education responses include imputed Don't Know/Refused answers.

Weighting Procedures, FY 2012 Diary Data

As mentioned above, 8,255 households participated in the recruitment phase of the FY 2012 HDS, and 5,131 households completed usable diaries. Balancing weights for the FY 2012 HDS diary data were developed in the same way as for the recruitment data. An additional age weight was derived based on the age of the head of household using the following categories: 18–21, 22–24, 25–34, 35–44, 45–54, 55–64, 65–69, 70–74, and over 75 years old.

Other adjustments to weights used in the diary data included a quarterly adjustment, which accounted for variances in sampling across postal quarters. All component weights were multiplied together and normalized to ensure that the number of weighted cases equals the number of unweighted cases.

A final adjustment in the form of expansion factors was made to expand the sample to the level of total households in the United States at the time of data collection, which was 121.07 million. The number of households in the United States was divided into the number of households that participated in the diary portion of the survey. The resultant factor was applied to each household in the survey. The expansion factor was multiplied by the sampling weight and then multiplied by 52 (the number of calendar weeks in one year) to derive nationwide annual volume estimates from the sample data.

Expansion Factor

121,074,207 / 5,131 = 23,596.6

Component Weight:

$$\omega = \frac{Ps / Pt}{Ss / St},$$

Where Ps = population count in cohort and
Pt = total population count
Ss = sample count in cohort
St = total sample count

Adjustment Factors

In order to account for variations in the reporting of household mail volumes, three types of adjustment factors were used:

1) Destination adjustment factors;

2) Household-to-Household adjustment factors; and

3) Household-to-Non-household adjustment factors.

Destination adjustment factors were based on an average of historical ratios of volumes derived from FY 2012 HDS sample data and mailing volumes reported in the Postal Service's RPW report. These destination adjustment factors were applied to First-Class Mail, Standard and Nonprofit Mail, Package and Shipping Services, and Periodicals.

Household-to-household adjustment factors were applied based on the logic that mail originating and destinating in households form a "closed loop." In other words, mail sent by households to households should equal mail received by households from households. (This situation does not necessarily exist within the confines of a finite sample since households may receive mail from households outside the sampling frame.) Therefore, household mail sent is adjusted to equal household mail received. This factor (1.19) was applied to personal First-Class Mail.

Household-to-non-household adjustment factors were applied to account for under-reporting of mail sent by households to non-households. The use of this adjustment factor is based on a comparison between the reported bills paid by households from the recruitment phase of the survey and amounts derived from actual diary data. This factor (1.41) was applied to business First-Class Mail sent by households to non-households.

The following table indicates adjustment factors applied by postal classification.

Table B.13:
HDS 2012 Adjustment Factors Utilized by Postal Classification

Postal Classification	Destination Adjustment Factor	Household-to-Household	Household-to-Non-household
First-Class	0.92	1.19	1.41
Standard Regular	0.88	N/A	N/A
Standard Nonprofit	0.88	N/A	N/A
Package & Shipping Services	0.75	N/A	N/A
Expedited	0.79	N/A	N/A
Periodicals	0.83	N/A	N/A

Appendix C: Survey Instruments

Appendix C1: Recruitment Questionnaire

Recruitment Questionnaire – FY 2012

Acronym Dictionary
DK = Don't Know
RF = Refusal
NA = Not applicable

1. [INT01] Hello, my name is _____, and I'm calling on behalf of the U.S. Postal Service. Are you the head of the household? IF NOT May I speak with him or her, please?

THE HOUSEHOLD NAME IS <HHNAM> THE CALLBACK NAME WE HAVE IS <NAME> IF NAME IS BLANK, IT IS UNLISTED SAMPLE.

OK.....Continue =>GO TO END
NA.....No Answer =>GO TO END

WC .....WILL COMPLETE ON WEB=>GO TO END
KN .....NEW NUMBER=>GO TO Tel01
IH.....LANGUAGE BARRIER, DEAF/TTY=>GO TO END

2. [LETTR] The U.S. Postal Service is conducting a study to better understand the type and amount of mail households like yours receive and send. The information will be used to make better decisions about postage rates and staffing needs to ensure an efficient national mail system and keep costs at a minimum. We recently sent a letter explaining the study and to let you know we would contact you. Did you receive our letter?

1.....Yes => CONTINUE WITH INT05
2.....No => VERIFY ADDRESS [SKIP TO VADD]

3. [INT05] For this study, your household will use diaries to answer questions about the mail you receive and send for one week, and you will receive a gift for completing the diaries. Before I can get your diaries out to you, I need to get some information about your household.

IF NEEDED – TYPICALLY ONLY NEED THIS KIND OF TERMINATION AT END OF A QUARTER;
SEE CURRENT PROGRAM AND MODEL THIS TO MATCH:
Your household was selected to participate in the diary study the week of _____. I'm sorry your household is not eligible for another week, but thank you for your time and interest.

OK.....Continue

RH.....Hang Up =>GO TO END

4. [VADD] I'd like to verify your mailing address. Is it . . .
ADDR<MADDR> APT<MSUIT> CITY<MCITY> STATE<MSTAT> ZIP<MZIP1>

1 .....Yes
2 .....No
9 .....RF

IF REFUSED VADD, CODE AS RA (REFUSED ADDRESS), THANK AND TERMINATE.
I understand not wanting to give out your address, but to participate in the survey and be eligible to receive 100 First Class stamps or $40, I'll need to verify your mailing address.

AFTER VERIFYING ADDRESS IF LETTR=2, READ INT05 BUT THEN SKIP TO VPHON.

5. [VPHON] The phone number we have for you is <PHONE>. Is that correct?

6. [POBOX] Does your household rent a PO Box at either the Post Office or a private mailing service, like Post Office Plus, or Parcel Place? PROBE IF THEY JUST SAY YES: Is that at the Postal Service or private mailing firm?

1 .....PO BOX AT USPS
2 .....BOX AT PRIVATE MAILING SERVICE
3 .....NEITHER – DOES NOT HAVE A PO BOX OR PRIVATE COMPANY
4 .....BOTH
7.....OTHER, SPECIFY
8 .....DK
9 .....RF

7. [RECV] Do you receive mail in your home mailbox?

WE WANT TO KNOW IF THEY RECEIVE MAIL AT THEIR PHYSICAL HOME ADDRESS

1.....Yes
2.....No
8.....DK
9.....RF

IF RECV = 1, CONTINUE

IF RECV = 2, 8 OR 9, THANK AND TERMINATE, AND MARK IT QN or QM

QN=wrong address if street address different from sample file but continue if street address is same but apartment is different from sample file; APTML no longer valid
QM=doesn't receive mail in their home mailbox

8. [Q1] RESPONDENT GENDER, DON'T ASK

1.....Male
2.....Female

9. [Q9R] Which of the following methods of mailing personal packages—not letter mail—have household members used in the last six months? [MARK ALL THAT APPLY]

1.....Took package to the Post Office
4.....Gave the package to our mail carrier
6.....Used an Automated Postal Center
3.....Used a private package shipping company, like UPS, FedEx, etc.
2.....Took it to a private mailing service, like Post Office Plus or Parcel Place, etc.
7.....OTHER, SPECIFY
5.....NONE (HAVE NOT MAILED PACKAGES IN THE LAST SIX MONTHS)
8.....DK
9.....NA/RF

10. [Q12] How many times in an average month do household members go to a U.S. Postal Office but not to the service counter? IF NEEDED: We mean an outside drop off box, going to your PO Box, or using an automated machine.

VERIFY RESPONSE IF MORE THAN 30, RANGE: 0-60

98.....DK
99.....NA/RF

11. [Q14B] How many times in an average month do household members go inside a U.S. Postal Office to the service counter?

VERIFY RESPONSE IF MORE THAN 30, RANGE: 0-60

00.....NONE
98.....DK
99.....NA/RF

12. [Q13] How many times in an average month do household members go to a private mailing service?
RANGE: 0-30

00 .....None => GO TO Q22
98 .....DK => GO TO Q22
99 .....NA/RF => GO TO Q22

13. [Q14] Why does your household use a mailing service rather than the post office?

IF THEY SAY "CONVENIENT" OR "EASIER" OR OTHER VAGUE RESPONSE,
ASK "Why is it convenient or easier?" SELECT BEST FIT.

01 .....HOURS-LONGER/LATER
02 .....LOCATION
03 .....OFFERS PICK UP SERVICE
04 .....CHEAPER
05 .....FASTER/OVERNIGHT DELIVERY
06 .....OFFERS DROP OFF SERVICE
07 .....PACKAGES IT UP
08 .....SERVICE-BETTER/MORE EFFICIENT/FRIENDLY
09 .....MORE RELIABLE/SEEMS SAFER
11 .....USES ONLY IN SPECIAL CIRCUMSTANCES
12 .....EXTRA SERVICES (COPYING, FAXES, MAIL BOXES, ETC.)
13 ..... SHORTER WAIT TIME/LINES, LESS CROWDED
14 ..... 'SHIP TO' REQUESTED IT
16 ..... ACCEPTS ODD-SHAPED/OVERSIZED PACKAGES
18 ..... ON-LINE TRACKING SERVICE
20 ..... USES ONLY FOR JOB/WORK-RELATED PACKAGES
21 ..... TO USE UPS OR FEDEX
22 ..... RETURNING AN ORDER (SENDING BACK USING THE SERVICE THAT COMPANY USED TO SHIP IT)
97 ..... OTHER, SPECIFY
98……..DK
99 ..... RF

14. [Q22] Many people are now using the Internet to communicate, pay bills and conduct other household activities that were traditionally done by mail. In this next set of questions, we'll be asking about your household's access to and use of the Internet, including accessing the web through a mobile device. How many adults age 18 or older in your household connect to the Internet from home?
RANGE: 0-9

98 .....DK
99 .....RF

IF Q22 = 0, 98 or 99, SKIP TO **Q24**

15. [Q23] What is the primary type of Internet connection used in your home?

01 .....Dial-up (modem)
05 .....DSL
03 .....Cable modem
04 .....Other Broadband (for example, fiber optic)
02 .....Mobile Broadband (such as a Smart Phone)
06 ..... [BLANK]
07 ..... OTHER, SPECIFY
99 ..... DK/RF

16. [Q24] Do any of the adults in your household access the Internet from any other location, such as work or a library?

1 .....Yes
2 .....No
8 .....DK
9 .....NA/RF

ASK EVERYONE Q55A

17. [Q55A] [IF ((**Q22**=0, 98, 99 or Missing) AND (**Q24**= 2,8,9, or Missing))] How many of each of these devices do adult members of your household use to access the Internet? [Range 0-30]

[Q55A1] Desktop Computer
98……..DK
99……..RF
[Q55A2] Laptop
98……..DK
99……..RF

IF Q85 = 99: IF NEEDED: This more specific detail is used to analyze the data and will not be used for any purpose outside this study.
IF RF A 2ND TIME, CONTINUE WITH THE SURVEY
IF THEY PROVIDE AN ANSWER, BE SURE TO SAY THANK YOU!

74. [Q86] IF OVER $50K Stop me when I say an income category that best matches your household income…

08.....$50,000 - $64,999 a year
09.....$65,000 - $79,999 a year
10.....$80,000 - $99,999 a year
11.....$100,000 - $119,999 a year
12.....$120,000 - $149,999 a year
13.....$150,000 and over
98.....DK
99.....RF

IF Q86 = 99: IF NEEDED: This more specific detail is used to analyze the data and will not be used for any purpose outside this study.

75. [Q66] How many workers earning at least $5,000 per year are there in you household? RANGE 0-11

98.....DK
99.....RF

76. [Q87] Do you own or rent your home?

1.....Own
2.....Rent
9.....NA/RF

77. [Q88] How long have you lived in your present home? RANGE 0-80

IF LESS THEN ONE YEAR, ENTER ZERO

98.....DK
99.....RF

78. [Q89] Which of the following best describes your home?

1.....Single family detached home
2.....Apartment or condominium
3.....Mobile home
6.....Duplex or townhouse
8.....DK
9.....RF

79. [CLPHL] How many cellular telephones does your household have? RANGE 0-20

00 .....NONE
01 .....ONE
98 .....DK
99 .....RF

80. [Q92] Do you or any member of your household have a business that is operated from home?

1 .....YES
2 .....NO => GO TO Q97
8 .....DK => GO TO Q97
9 .....RF => GO TO Q97

81. [Q93] About how many pieces of mail does the business receive each week? RANGE 0-75

VERIFY RESPONSE IF ZERO

98 .....DK
99 .....RF

82. [Q94] About how many pieces of mail does the business send each week? RANGE 0-75

VERIFY RESPONSE IF ZERO

98 .....DK
99 .....RF

83. [Q95] Do you do a lot of business work from your home?

1 .....YES
2 .....NO
9 .....NA/RF

84. [SCRP7] Remember, when you do your household diary, we are interested only in household mail, so please do not include this business mail in your diary.

85. [Q97] We just have a few more questions. As I mentioned earlier in our conversation, the second part of this study involves daily diaries. In them, you answer detailed questions about the mail your household sends and receives for 7 days. Once you complete the diaries, you will receive your choice of either 100 First-Class stamps or a $40 check. You can expect your gift to arrive roughly 10 to 12 weeks after we receive your completed diaries.

IF NEEDED: How long it takes depends on how much mail you receive. The first day of your diary-recording week will take the longest as you become more familiar with the survey. After that, on average, it should take about 3-5 minutes for each piece of mail. However, we have a USPS hotline available to provide you with step-by-step instructions if needed, and to answer any questions you may have.
IF ASKED: That toll free number is 888-441-8777.

1 .....Continue
9 .....RF => GO TO OLIST

86. [GIFT] Which gift would you like to receive for completing the diaries?

2 .....100 First-Class stamps [IF ASKED, YES, WE SEND FOREVER STAMPS]
3 .....Forty dollars

87. [ASSNC] We'd like for you to answer questions about your household's mail for the week of READ DATE. Is that a good week for you? IF NOT, THEN OFFER NEXT ASSN WEEK. So let me confirm that you understand we'll be mailing you a set of household diaries that you'll complete during your assignment week, which is READ DATE. In appreciation for completing those diaries, we will send you the gift you requested which takes about 10-12 weeks once we receive your completed diaries. Do you have any questions for me about the diaries? ANSWER QUESTIONS AS NEEDED AND CONTINUE

1.....CONTINUE

IF NEEDED: TYPICALLY ONLY NEED THIS KIND OF TERMINATION AT END OF A QUARTER.
IF NOT OKAY, SAY: I'm sorry, but your household was selected to participate the week of _____. I'm sorry your household is not eligible, but thank you very much for your time and participation.

88. [RFNAM/RLNAM] Can you please provide me with your first and last name so the materials can be addressed and mailed correctly??

RESPONDENT NAME

PLEASE ENTER ONLY THE FIRST AND LAST NAME OF THE RESPONDENT. PLEASE DO NOT ENTER MIDDLE INITIAL, MR. OR MRS.

FOR PROCESSING PURPOSES, IT IS IMPORTANT THAT WE HAVE ONLY ONE FIRST AND ONE LAST NAME PER HOUSEHOLD. ANY ADDITIONAL INFORMATION WILL DELAY PROCESSING.

89. [MATRL] Would you prefer your diary materials in English or Spanish?

ASK ONLY IF ANY PORTION OF SURVEY WAS CONDUCTED IN SPANISH.
(IF ALL OF SURVEY WAS CONDUCTED IN ENGLISH, PICK "ENGLISH.")

1.....ENGLISH
2.....SPANISH

90. [DIFHP] A few days after we mail your diaries, we want to call to make sure you've received them and also to remind you of the dates we need you to track your mail. When we do this, should we call you at this number or is there a different number where you would prefer to be called? READ THE NUMBER TO RESPONDENT

1.....YES, THE NUMBER IS OK
2.....NO, CALL DIFFERENT NUMBER => [NEED TO COLLECT DIFFEENT NUMBER]

Next question => go to [THANK]

91. [CB] What would be a good day and time to call you back? => GO TO NAME

92. [NAME] Who should I ask for when I call back? => GO TO END

93. [THANK] Thank you very much for helping us. I have a toll free phone number where you can reach us– would you like to write it down? IF RESPONDENT WANTS NUMBER, READ SLOW ENOUGH FOR THEM TO WRITE That number is 1-888-441-8777. Goodbye and have a nice evening/day.

94. [INT03] Although you do not wish to continue with our survey, we appreciate the time you have given us today. Thank you and goodbye.

RF .....Refused to do diaries => GO TO END

95. [INT10] Thank you very much for your time. I'm sorry if we inconvenienced you, but we need to attempt to contact the household currently using the other mailing address. Have a nice evening/day. Goodbye. IF NEEDED: For this survey, the USPS has randomly selected households based on their mailing address. If you have any questions, please call 1-888-441-8777.

QN……Not qualified due to address change => GO TO END

96. [OLIST] IF REFUSES TO PARTICIPATE In DIARY STUDY: Would you please tell me why you do not want to participate in our survey? OPEN END => INT03 code as RF

Thank you very much. Goodbye and have a nice evening/day.

97. [INTRO] Hello, this is _____, calling on behalf of the U.S. Postal Service. May I please speak with<NAME>? We began an interview concerning your household's mail and I would like to complete that interview now.

IF THERE IS NO NAME HERE, THEN THIS IS NOT A PARTIAL SO RESTART

2 .....CONTINUE WHERE I LEFT OFF
1 .....RESTART AT THE BEGINNING

98. [INT] ENTER FINAL DISPOSITION.

CP…….PARITAL COMPLETE => GO TO CB
RP…….PARTIAL REFUSAL => GO TO REFUS
RL…….REMOVE MY NAME DO NOT CALL AGAIN => GO TO OLIST
RF…….STRONG REFUSAL => GO TO REFUS
KP…….PARTIAL COMPLETE, CALLBACK NEXT QUARTER (only appears close to the end of each quarter) => GO TO END

99. [INT04] Thank you very much for your time. I'm sorry if we inconvenienced you, but we need households that receive their mail at their home address. Have a nice evening/day. Goodbye.

QM……. DOES NOT RECEIVE MAIL AT HOME ADDRESS => GO TO END

100. [INT99] SURVEY COMPLETE

CM…….COMPLETE

101. [REFU1] ENTER THE REASON THIS RESPONDENT IS REFUSING

UNITED STATES POSTAL SERVICE

May 16, 2013

Postal Resident
«ADDRESS»
«CITY», «STATE» «ZIP» «SAMPN»-«REPLICATE»

The U.S. Postal Service is guided by one principle: we exist to serve our customers. This vision is our commitment to ensuring a vital Postal Service for future generations.

To assist us in meeting that commitment, we are conducting our 25th annual Household Diary Study. That's why your household, along with others in your area, were selected to answer questions about your household's mail and to record information about the mail your household sends and receives for a one-week period.

We will provide your household with postal diaries in which to record this information, along with easy-to-read instructions on how to complete them. This information will help us better understand current trends in the volume and types of mail households handle on a daily basis. Ultimately, your response will help us make important decisions about performance improvements and investments in new equipment, facilities, programs, and technologies to better serve you.

As thanks for your time and participation in this study, you will have a choice of ONE of the following:

- **Forty dollars**
- **100 First-Class stamps**

We will make your participation as convenient as possible. You have two options for being part of the Household Diary Study:

Online – This is the simplest and most convenient; you can complete the initial questionnaire about your household and the mail you send and receive any time you want by going to: **http://surveys.nustats.com/USPSWEB.htm** and enter **PIN #: «SAMPN».**

Phone – Within the next few days, we will call you to answer any questions you might have and conduct the initial interview or make an appointment to do the interview when convenient to you.

All information collected is strictly confidential in order to protect your privacy.

For any questions about the project or to give us the best phone number and time for reaching you, please visit **www.nustats.com/uspsstudy.htm** anytime, or call our hotline at **1-888-441-8777** between 11am and 9pm Central time Monday to Wednesday or 12pm to 5pm Thursday to Sunday.

Thank you for joining us in the Household Diary Study!

Sincerely,

John F. Mazzone
Managing Editor, USPS Household Diary Study

16 de mayo de 2013

Residente Postal
«ADDRESS»
«CITY», «STATE» «ZIP» «SAMPN»-«REPLICATE»

El Servicio Postal de los Estados Unidos se conduce bajo un principio: existimos para servir a nuestros clientes. Esta visión es nuestro compromiso para asegurar un Servicio Postal vital para las futuras generaciones.

Para ayudarnos a alcanzar este compromiso, estamos realizando nuestro 25vo Estudio Domiciliario en Diarios anual. Esta es la razón por la cual su hogar, junto con otros en su área, fue seleccionado para responder preguntas acerca del correo de su hogar y registrar la información acerca de la correspondencia enviada y recibida por su hogar en un período de una semana.

Le proporcionaremos a su hogar unos diarios postales en los cuales podrá registrar esta información, junto con instrucciones de fácil lectura acerca de cómo completarlos. Esta información nos ayudará a entender mejor tendencias actuales en el volumen y tipos de correo que los hogares manejan de forma diaria. Por último, su respuesta nos ayudará a tomar decisiones importantes acerca de mejoras en nuestro desempeño e inversiones en nuevos equipos, instalaciones, programas y tecnologías para servirle mejor.

Como muestra de agradecimiento por su tiempo y participación en este estudio, usted tendrá la opción de recibir <u>uno</u> de los siguientes:

- **Cuarenta dólares**
- **100 Estampillas de primera clase (First-Class)**

Haremos todo lo posible para que su participación se realice de la manera más conveniente para usted. Tiene usted dos opciones para ser parte del Estudio Domiciliario en Diarios:

Internet – Participar por Internet es la opción más fácil y conveniente. En cualquier momento, usted puede completar la primera parte del estudio en la que se le hacen preguntas sobre su hogar y el correo que envía y recibe. Sólo visite **http://surveys.nustats.com/USPSWEBSP.htm** e ingrese el **número de PIN: «SAMPN»**.

Teléfono – Dentro de los próximos días, le llamaremos para contestar cualquier pregunta que tenga e iniciar la primera parte del estudio o programar una hora que sea conveniente para usted.

Toda la información recopilada es estrictamente confidencial para proteger su privacidad.

Si tiene cualquier pregunta sobre el estudio o desea proporcionarnos un número telefónico y la hora más conveniente para comunicarnos con usted, por favor visite **www.nustats.com/uspsstudy.htm** en cualquier momento, o llame gratis a nuestra línea de asistencia del proyecto al **1-888-441-8777** de lunes a miércoles de 11am a 9pm hora central o jueves a domingo de 12pm a 5pm.

¡Agradecemos su participación en el Estudio Domiciliario en Diarios!

Atentamente,

John F. Mazzone
Director Editorial, Estudio Domiciliario en Diarios de USPS

Diary Package Cover Letter

USPS Household Diary Study

What is the Household Diary Study?

The Household Diary Study is a national research effort sponsored by the U.S. Postal Service. The information collected from households like yours will be used to help us design systems to use our resources most effectively, develop strategies for making wise decisions, and monitor the effects of electronic technology on regular mail service. Ultimately, the data will be used to find ways of keeping the cost of service at a minimum.

The study is conducted on our behalf by NuStats, a professional research firm in Austin, Texas. NuStats ensures all information collected is strictly confidential and is used for our research purposes only. The information from your household will be used only in combination with data from other participating households.

What are we asking of you?

Answer questions about all the mail and packages your household receives and sends for seven days.
We are only interested in the mail you send and receive for the dates that are on your Answer Booklets.

Here's how:

- **Read Steps 1-7 in the Instruction Booklet first** – this is important because it explains how to correctly fill out the Answer Booklets and provides visual examples.
- **Review the Photo Quick Start**.
- **Answer questions from the Question Booklet by recording the codes in the Answer Booklets**. Do this for all the mail and packages your household receives and sends each day.
- **Select your choice of gift on the Gift Selection Form** *(please allow 10-12 weeks for processing)*.
- **Return all completed Answer Booklets, Mail Pieces, and the Gift Selection Form in the postage-paid Priority Mail envelope** – drop in any public U.S. Postal Service mailbox or post office.

Your package includes: *(each item is numbered in the top right-hand corner)*

1.	Instruction Booklet	**4a.-4g.**	Answer Booklets – 1 for each day	**7.**	"I'm done . . ." postcard
2.	Photo Quick Start	**5a.-5g.**	Daily Envelopes – 1 for each day	**8.**	Priority Mail envelope
3.	Question Booklet	**6.**	Gift Selection Form		

If you have any questions about how to complete the survey, call the USPS Hotline at **1-888-441-USPS (8777)** available 11am-9pm CST (Mon-Wed), 11am-5pm CST (Thu & Fri), or 12pm-5pm CST (Sat & Sun).

I would like to thank you again for your participation and willingness to do the research that will help us improve our performance at your local post office.

Sincerely,

John F. Mazzone
Managing Editor, USPS Household Diary Study

Appendix C2: Diary Package

Instruction Booklet

UNITED STATES POSTAL SERVICE®

1

Instruction Booklet

PLEASE READ THIS FIRST!

Includes instructions for completing the Answer Booklets and examples of postage and mail markings for each type of mail, behind the color-coded tabs

Common Terms & Questions

Here are definitions of some of the terms that we use throughout the Household Diary materials and the most frequently asked question.

Common Terms

- **Mail Pieces** are the different pieces of mail that you receive and send – letters, bills, postcards, magazines, advertisements, packages, etc.
- **Mail Type** is the category of mail that we ask you to sort your mail into. *(See the list of 6 mail types on page 1 of this booklet.)*
- **Postage** is how the piece of mail was paid for when it was sent. There are three different types of postage: Stamps, Meter, or Permit. *(See the visual examples under the color-coded tabs for each mail type*.)
- **Mail Markings** are markings that are printed on a mail piece either by the U.S. Postal Service or the mailing house. These markings indicate the postage paid and the type of mail. The Postage and Mail Markings are typically located in:
  a) the top right-hand corner of the mail piece,
  b) above or below the address, or
  c) inside the window of an envelope.

What is the difference between First-Class Mail and Presorted Standard Mail?

These are the two most common mail types. Here are some ways to help distinguish between them:

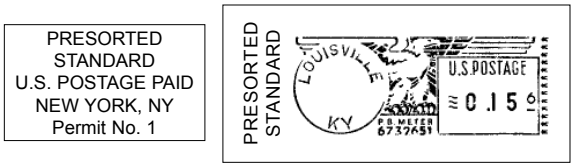

- **First-Class Mail** from businesses are often marked “First-Class” or “Presorted First-Class,” especially when they don’t have stamps. If the mail piece just has a stamp or metered strip without any of these markings, it is likely First-Class Mail.
  Hint: Most letter size envelopes will have postage of 45¢ or more , either in First-Class stamps, a metered strip, or a “Forever Stamp.”
  If it is **Presorted First-Class**, it may have less postage but it will say “Presorted First-Class.” *(See pages 5-9 in this booklet for descriptions & more visual examples.)*

Examples of Presorted First-Class Mail Markings

- **Presorted Standard** Mail pieces are always marked “Presorted Standard,” or “PRSRT STD,” or “Standard,” or “STD” usually in the upper-right corner of the mail pieces close to the stamp or meter strip. *(See pages 10-14 in this booklet for descriptions & more visual examples.)*

Examples of Presorted Standard Mail Markings

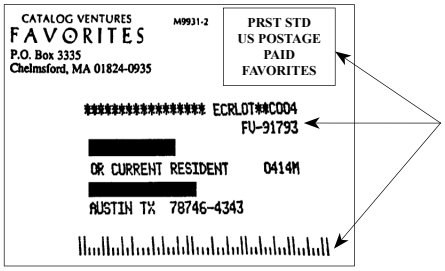

How to fill out the Answer Booklets.

1 Sort your daily mail into groups by mail type.

The first step is to sort your mail each day into groups of mail types by looking at the postage and other markings on your mail (we call these "mail markings"). All the mail you receive can be classified as one of the following 6 types*:

1. **First-Class / Presorted First-Class Mail** (Purple pages)
2. **Presorted Standard Mail (PRSRT STD)** (Blue pages)
3. **Nonprofit Organization Mail** (Gray pages)
4. **Packages & Expedited Materials** (Green pages)
5. **Magazines, Newspapers, or Other Periodicals** (Yellow pages)
6. **Unaddressed Mail** – Delivered by US Postal Service only (Pink pages)

To Sort: Look at the Postage & Mail Markings

Postage & Mail Markings can be located:

- in the top right-hand corner,
- above or below the address, or
- inside the window of an envelope.

***To help you sort your mail, see the examples of postage and mail markings under the colored tab associated with each mail type.**

We are only interested in your household mail:

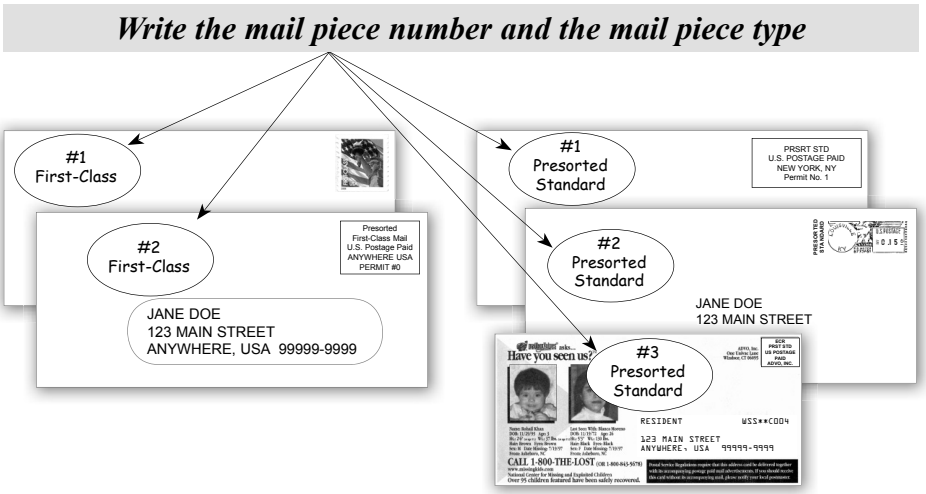

- Please DO NOT include any mail received or sent for a business, club, or association operated from your home.
- Only record mail sent to your home; DO NOT include any mail sent to your PO Box.

Special Circumstances

- If you did not receive or send any mail or packages, or if there was no mail service one day during your assigned week, put an "X" in the box labeled "Did Not Receive or Send any Mail/Packages Today" on page 1 of the Answer Booklet for that day.
- If household members will be away from home on any day(s) during the diary week, record all mail received in the daily answer booklet for the day on which you return.
- If you forget to pick up your mail for a day, record all mail received on the next day.
- Sunday is included in your diary week. You may not receive mail on Sunday, but you may receive packages and/or send mail out.

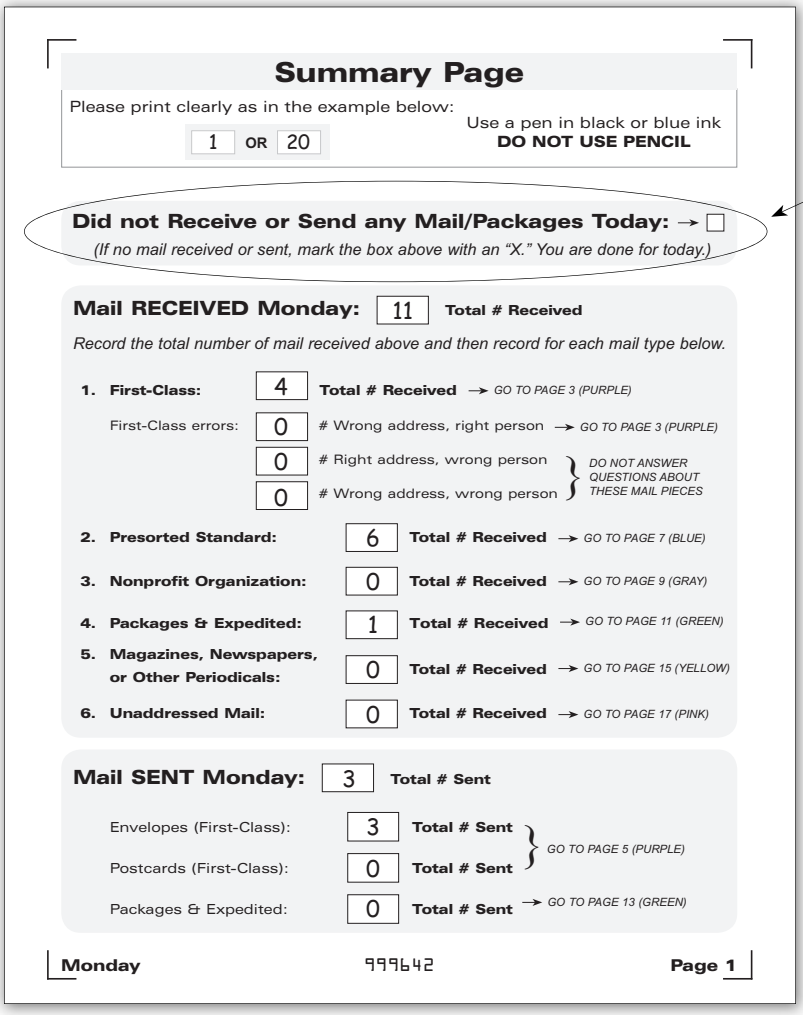

2 Number and label the mail pieces within each mail type.

Once your mail is sorted for that day, write the mail type on each piece of mail and then number the mail pieces within each mail type. For example, the top First-Class mail piece is #1, the next is #2, and so on until you have numbered all First-Class Mail for that day. Next, number all the other types of mail (Presorted Standard, Nonprofit, Packages, etc.) beginning again with #1, and then #2, and so on for each different mail type.

3 Complete the Summary Page (page 1) in the Answer Booklet for each day.

On this page, record the total number of mail pieces of each type that all members of your household received and sent that day. *(See Summary Page example below.)*

Summary Page

Please print clearly as in the example below: 1 OR 20

Use a pen in black or blue ink **DO NOT USE PENCIL**

Did not Receive or Send any Mail/Packages Today: → ☐

(If no mail received or sent, mark the box above with an "X." You are done for today.)

Mail RECEIVED Monday: 11 **Total # Received**

Record the total number of mail received above and then record for each mail type below.

1. **First-Class:** 4 **Total # Received** → *GO TO PAGE 3 (PURPLE)*
   - First-Class errors: 0 # Wrong address, right person → *GO TO PAGE 3 (PURPLE)*
   - 0 # Right address, wrong person
   - 0 # Wrong address, wrong person
   - } *DO NOT ANSWER QUESTIONS ABOUT THESE MAIL PIECES*
2. **Presorted Standard:** 6 **Total # Received** → *GO TO PAGE 7 (BLUE)*
3. **Nonprofit Organization:** 0 **Total # Received** → *GO TO PAGE 9 (GRAY)*
4. **Packages & Expedited:** 1 **Total # Received** → *GO TO PAGE 11 (GREEN)*
5. **Magazines, Newspapers, or Other Periodicals:** 0 **Total # Received** → *GO TO PAGE 15 (YELLOW)*
6. **Unaddressed Mail:** 0 **Total # Received** → *GO TO PAGE 17 (PINK)*

Mail SENT Monday: 3 **Total # Sent**

- Envelopes (First-Class): 3 **Total # Sent**
- Postcards (First-Class): 0 **Total # Sent**
- } *GO TO PAGE 5 (PURPLE)*
- Packages & Expedited: 0 **Total # Sent** → *GO TO PAGE 13 (GREEN)*

Monday 999642 **Page 1**

If you did not receive or send any mail or packages, or if there was no mail service one day during your assigned week:

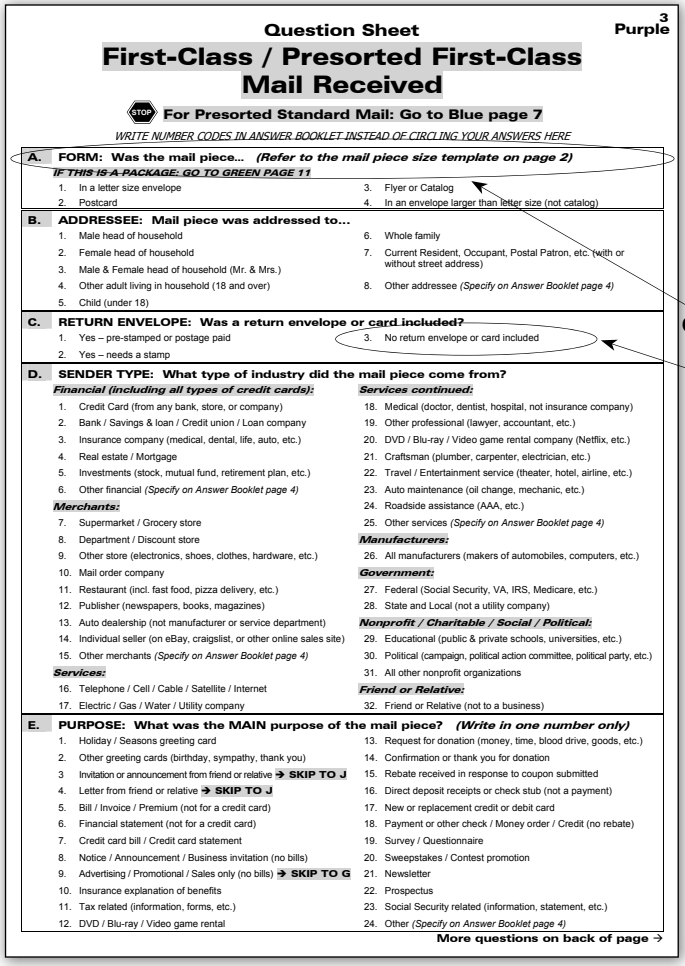

Put an "X" in the box labeled "Did not Receive or Send any Mail/Packages Today" on the summary page for that day.

4 Open both the Question Booklet and the Answer Booklet for that day to the colored pages for the type of mail piece you have.

You will use a different Answer Booklet for each day of the week, but you use the same Question Booklet each day. Read the questions from the Question sheet (in the Question Booklet) and find the correct answers (number codes), then write them on the Answer sheet in the Answer Booklet. There are colored pages for each mail type: First-Class Mail is purple, Presorted Standard Mail is blue, etc. You can record up to 12 mail pieces for each mail type. **Remember, the postage on the mail piece determines which colored Question and Answer sheets to use.**

1. In the Answer Booklet for that day, write in the answer on the Answer Sheet using the correct number code found in the Question Booklet.
2. Starting with mail piece #1, Question A, write the codes under column #1. Using the Question Booklet, continue down the page to Question B.
3. After you are finished answering questions for mail piece #1, continue on to the questions for mail piece #2 in column #2. Continue in this way for each mail piece within each type.

Question Sheet (in Question Booklet)

Question Sheet — Purple 3

First-Class / Presorted First-Class Mail Received

STOP For Presorted Standard Mail: Go to Blue page 7

WRITE NUMBER CODES IN ANSWER BOOKLET INSTEAD OF CIRCLING YOUR ANSWERS HERE

A. FORM: Was the mail piece... ***(Refer to the mail piece size template on page 2)***

IF THIS IS A PACKAGE: GO TO GREEN PAGE 11

1. In a letter size envelope
2. Postcard
3. Flyer or Catalog
4. In an envelope larger than letter size (not catalog)

B. ADDRESSEE: Mail piece was addressed to...

1. Male head of household
2. Female head of household
3. Male & Female head of household (Mr. & Mrs.)
4. Other adult living in household (18 and over)
5. Child (under 18)
6. Whole family
7. Current Resident, Occupant, Postal Patron, etc. (with or without street address)
8. Other addressee *(Specify on Answer Booklet page 4)*

C. RETURN ENVELOPE: Was a return envelope or card included?

1. Yes – pre-stamped or postage paid
2. Yes – needs a stamp
3. No return envelope or card included

D. SENDER TYPE: What type of industry did the mail piece come from?

Financial (including all types of credit cards):

1. Credit Card (from any bank, store, or company)
2. Bank / Savings & loan / Credit union / Loan company
3. Insurance company (medical, dental, life, auto, etc.)
4. Real estate / Mortgage
5. Investments (stock, mutual fund, retirement plan, etc.)
6. Other financial *(Specify on Answer Booklet page 4)*

Merchants:

7. Supermarket / Grocery store
8. Department / Discount store
9. Other store (electronics, shoes, clothes, hardware, etc.)
10. Mail order company
11. Restaurant (incl. fast food, pizza delivery, etc.)
12. Publisher (newspapers, books, magazines)
13. Auto dealership (not manufacturer or service department)
14. Individual seller (on eBay, craigslist, or other online sales site)
15. Other merchants *(Specify on Answer Booklet page 4)*

Services:

16. Telephone / Cell / Cable / Satellite / Internet
17. Electric / Gas / Water / Utility company

Services continued:

18. Medical (doctor, dentist, hospital, not insurance company)
19. Other professional (lawyer, accountant, etc.)
20. DVD / Blu-ray / Video game rental company (Netflix, etc.)
21. Craftsman (plumber, carpenter, electrician, etc.)
22. Travel / Entertainment service (theater, hotel, airline, etc.)
23. Auto maintenance (oil change, mechanic, etc.)
24. Roadside assistance (AAA, etc.)
25. Other services *(Specify on Answer Booklet page 4)*

Manufacturers:

26. All manufacturers (makers of automobiles, computers, etc.)

Government:

27. Federal (Social Security, VA, IRS, Medicare, etc.)
28. State and Local (not a utility company)

Nonprofit / Charitable / Social / Political:

29. Educational (public & private schools, universities, etc.)
30. Political (campaign, political action committee, political party, etc.)
31. All other nonprofit organizations

Friend or Relative:

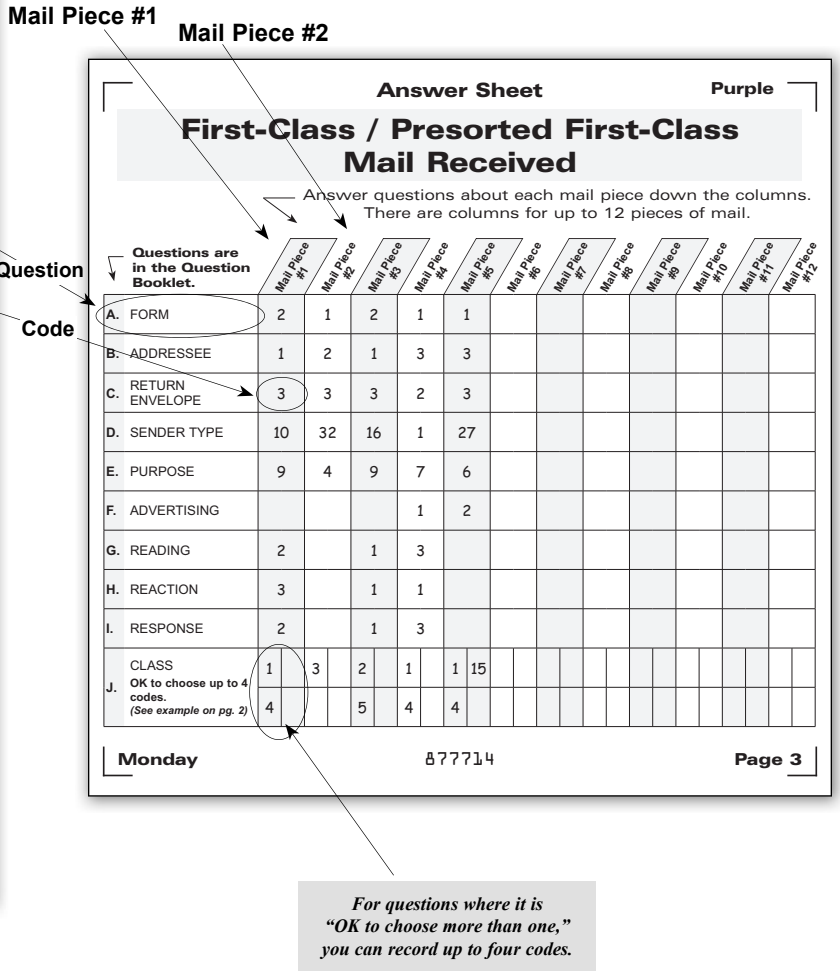

32. Friend or Relative (not to a business)

E. PURPOSE: What was the MAIN purpose of the mail piece? ***(Write in one number only)***

1. Holiday / Seasons greeting card
2. Other greeting cards (birthday, sympathy, thank you)
3. Invitation or announcement from friend or relative → SKIP TO J
4. Letter from friend or relative → SKIP TO J
5. Bill / Invoice / Premium (not for a credit card)
6. Financial statement (not for a credit card)
7. Credit card bill / Credit card statement

J. CLASS OK to choose up to 4 codes. *(See example on pg. 2)*	1 3 4		2 5	1 4	1 15 4							

Monday 877714 Page 3

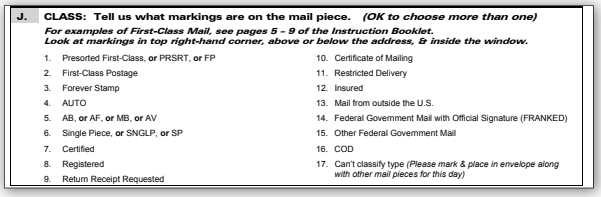

For questions where it is "OK to choose more than one," you can record up to four codes.

Mail Markings are important.

Tell us which mail markings are on the mail piece by answering the "Class" question at the end of each Question sheet (e.g., Question J for First-Class Mail).

To accurately answer this question, you need to record all the mail markings that are on each mail piece – these markings are placed on the mail piece either by the U.S. Postal Service or by a mailing house.

Question J - Class (First-Class Question sheet)

J. CLASS: Tell us what markings are on the mail piece. ***(OK to choose more than one)***

For examples of First-Class Mail, see pages 5 – 9 of the Instruction Booklet.
Look at markings in top right-hand corner, above or below the address, & inside the window.

1. Presorted First-Class, **or** PRSRT, **or** FP
2. First-Class Postage
3. Forever Stamp
4. AUTO
5. AB, **or** AF, **or** MB, **or** AV

5 Please send us your mail pieces.

We only need the envelope your mail came in, not the contents (unless it's something you don't need).
Please DO NOT CUT OUT the individual mail markings.

- **Remember to label each mail piece with the number and mail type you assigned it in the Answer Booklet** so we are able to match it to your responses.
- **If the mail piece is a catalog, magazine, flyer, or newspaper, just send the page with the mailing label and the postage.** We don't need the entire catalog or newspaper, etc.

Why do we need your mail pieces?

If we have your mail markings for each piece, we can double check that everything is correct. Each packet goes through an editing process that verifies that the mail pieces were recorded under the correct mail type (First-Class, Presorted Standard, etc.) and that all the questions were answered. The entire mail piece (i.e., the envelope) provides us with additional survey information, such as sender type.

All information collected is strictly confidential and is used for research purposes only.

6 Place your completed Answer Booklets and mail pieces in the envelopes marked Monday through Sunday.

Your completed Answer Booklets and mail pieces labeled with the mail type and mail piece number should be placed in the corresponding daily envelope.

7 Place the daily envelopes in the postage-paid Priority Mail envelope.

The daily envelopes with your completed Answer Booklets and mail pieces should be sent to PTV NuStats in the postage-paid Priority Mail envelope.

First-Class / Presorted First-Class Mail Received and Sent (Purple)

All First-Class Mail may not say "First-Class" on the envelope or postcard. It is important to look at the postage and mail markings on each mail piece to determine if it is First-Class or not. Use the following to help you determine if your mail piece should be recorded under this type:

- Include letter size envelopes marked "**First-Class**" or "**Presorted First-Class**."
- Include large envelopes marked "**First-Class**." Check the mail markings carefully; some large envelopes may be marked Presorted Standard or Expedited.
- Most First-Class Mail from businesses are marked "**First-Class**" or "**Presorted First-Class,**" especially when they have a metered strip and NOT a stamp.
- If the mail piece just has a stamp without being marked "**First-Class**" or "**Presorted First-Class**," (or Presorted Standard or Nonprofit, etc.) it is probably First-Class Mail.
- Most letter size envelopes will have postage of 45¢ or more, either in stamps or on a metered strip (the postage may also be in the form of a "Forever Stamp"). If it is "**Presorted First-Class,**" it may have less postage but it will be marked as "Presorted First-Class."
- Postcards *usually* have 32¢ postage for First-Class. Some postcards are larger in size than a typical picture postcard. However, if it is larger than the postcard dimensions (see page 2 of the Question Booklet), then it is considered a flyer.
- The most common First-Class Mail pieces are letters, bills, postcards, greeting cards, checks, and money orders.
- Include mail ***(that is not a package)*** sent with special services, such as Certified, Registered, or Insured.
- Include magazines, catalogs, newsletters, or other periodicals that are marked "**First-Class**."

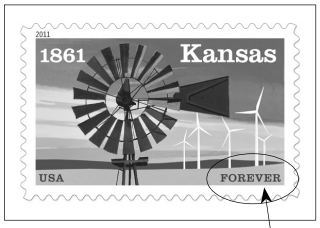

Examples of First-Class Mail postage and markings begin on the next page.

Presorted Standard Mail (Blue)

Use the following to help you determine if your mail piece should be recorded under this type:

- Include mail ***(that is not a package)*** that is marked "**Presorted Standard**," or "**PRSRT STD**," or "**Standard**," or "**STD**" whether it is a letter, postcard, large envelope, magazine, catalog, circular, or flyer, etc.

- Most **catalogs** are sent Presorted Standard. However, check to make sure it is marked "Presorted Standard," or "PRSRT STD," or "Standard," or "STD."
  Catalogs that are in envelopes marked "Bound Printed Matter" or items marked "Media Mail" or "Library Mail" should be recorded under "Packages & Expedited Materials" (Green pages).

Advertising often comes as a group of flyers, circulars, coupons, or other pieces that are not in an envelope.* These types of advertisements can be delivered in two different ways:

1. Your address may be printed on a **detached label card** that is delivered with separate advertising pieces that are grouped or folded together.

   If you get a detached label card, please record it under "**Presorted Standard Mail**," and then record the group of advertising pieces as **ONE** mail piece (regardless of how many flyers or circulars, etc.) under "**Unaddressed Mail**" on the Pink pages.

2. Your address may be printed directly on the group of advertising pieces.

   Please record the whole group as **ONE** mail piece under "**Presorted Standard Mail**." Record code #7 for Question B and code #2 for Question C.

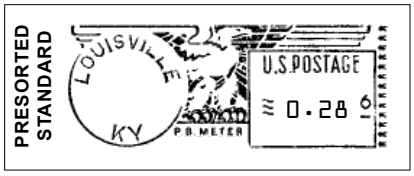

**Usually from more than one company or advertiser*

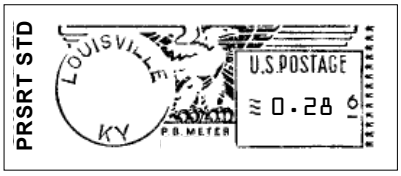

Examples of Presorted Standard postage & mail markings begin on the next page.

Nonprofit Organization Mail (Gray)

Use the following to help you determine if your mail piece should be recorded under this type:

- All Nonprofit Mail (that is not a package) must be marked "**Nonprofit Organization**," "**Nonprofit Org.**," **or** "**Nonprofit**."
- A few examples of Nonprofit Organizations are charities, schools, hospitals, churches, etc.
- Nonprofit Organization Mail may include requests for donations of money, your time, or other items, or they may be asking you to purchase an item or service.
- **Do not include** packages that are marked Nonprofit Organization. These should be recorded under "**Packages & Expedited Materials**" (Green pages).

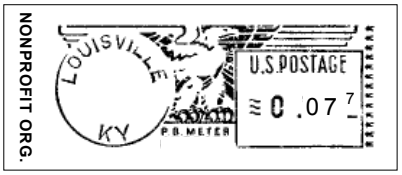

Examples of Nonprofit postage & mail markings begin on the next page.

Packages & Expedited Materials Received & Sent (Green)

Use the following to help you determine if your mail piece should be recorded under this type:

Packages (even if marked First-Class, Presorted Standard, etc.):

- Include ALL packages or boxes received or sent via the U.S. Postal Service (USPS) as well as packages delivered by any other organization, such as the United Parcel Service (UPS), FedEx, etc.

- Be careful to distinguish between packages delivered by the U.S. Postal Service (USPS) and those delivered by the United Parcel Service (UPS). The U.S. Postal Service (USPS) markings include an Eagle, while the United Parcel Service (UPS) markings have a shield.

Product Samples:

- Include product samples that were delivered by any organization, except those included in the newspaper.

Expedited Letters, Packages, and Boxes:

- Include letters, packages, and boxes that were delivered via the U.S. Postal Service (USPS), United Parcel Service (UPS), FedEx, or any other expedited mail carrier (see examples on the next page).

- You may see terms such as Express Mail, Priority Mail, Overnight, 2-day, 3-day, Next Day Air, 2nd Day Air, etc.

Examples of expedited mail carriers are included on the next page.

Expedited Mail Examples

Express Mail

Priority Mail

UPS

FedEx

Magazines, Newspapers, or Other Periodicals (Yellow)

Use the following to help you determine if a Magazine, Newspaper, or other Periodical should be recorded under this type:

- Examples include daily, weekly, and monthly magazines; alumni or fraternal magazines; and newspapers.

- **Only** include magazines, newspapers, or other periodicals that are delivered by the U.S. Postal Service (USPS) and that are NOT marked First-Class, Presorted Standard, or Nonprofit Organization. If they are marked with any of these other postage types, record them under the section for that mail type.

Do not include the following items under this section:

- Newspapers delivered by your local news carrier. (Do not include these in the diary study.)

- Magazines and newspapers you bought at the store or a newsstand. (Do not include these in the diary study.)

- Catalogs, which are typically sent “Presorted Standard (PRSRT STD).” (Check the postage type; these will likely be recorded in the Presorted Standard section.)

Unaddressed Mail
(Pink)

Use the following to help you determine if your mail piece should be recorded under this type:

- Only include mail delivered by the U.S. Postal Service (USPS). **Do not include** advertising material that has been left at your door, or material hung on your doorknob or left on your car.

- Include mail pieces that don't have an address label (if mail piece is labeled "Occupant" or "Resident," do not include in this section). Typically, this will only be weekly advertising flyers/circulars that are folded or grouped together and do not have an address label or postage on each piece. Simply record the whole group as ONE mail piece.

  (Please refer to page 10 in this booklet for additional information on recording unaddressed mail that comes along with a detached label card.)

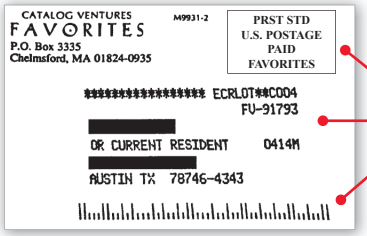

Appendix C2: Diary Package

Photo Quick Start

PHOTO QUICK START

Postage & Mail Markings can be:

- in the top right-hand corner,
- above or below the address, or
- inside the window of an envelope.

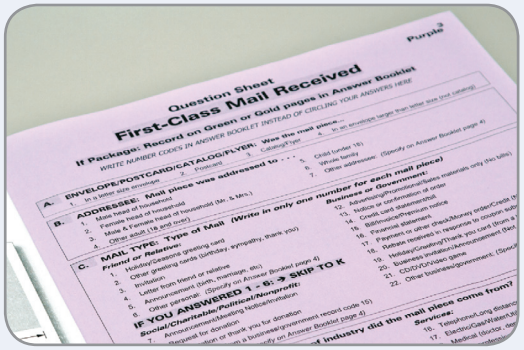

Use the Postage & Mail Markings on your mail to help you sort!

1 Sort your mail each day into the 6 types of mail listed on page 1 of the **Instruction Booklet.**

2 Label and number each mail piece within the 6 types of mail. (Photo shows First-Class only).

3 Open the **Answer Booklet** for Monday (or first mail day) to page 1 - Summary Page.

Record the total number of mail pieces you received that day for each mail type.

4 Open the **Question Booklet** to page 3 - First-Class Mail Received.

If you didn't receive any First-Class Mail that day, skip to page 5: First-Class Mail Sent, or page 7: Presorted Standard Mail, or other pages for mail types you did receive.

5 Write your answers to the questions from the Question Booklet in the **Answer Booklet**.

Be sure to record mail for each mail type you receive (Monday-Sunday) on the color-coded pages for that mail type.

Questions? Visit the project web page: www.nustats.com/uspsstudy.htm, call our USPS Hotline at: 1-888-441-USPS (8777), or e-mail your question to USPS@nustats.com

Example

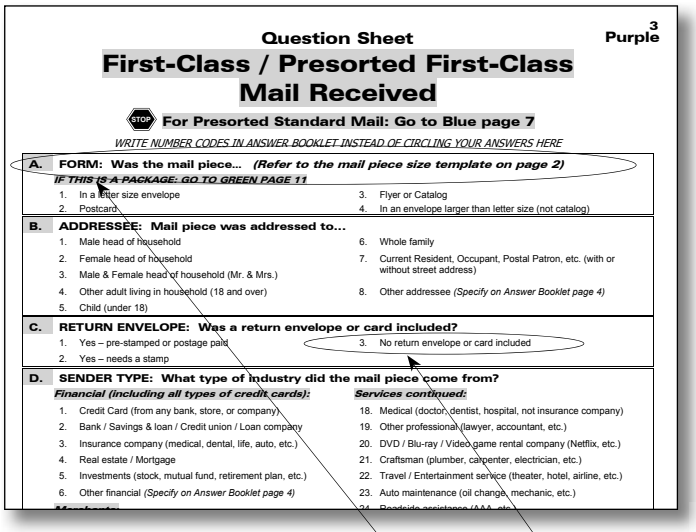

Once you've sorted and numbered your mail pieces, you are ready to begin recording information. Remember to use the postage and the mail markings on the mail piece to help you determine the mail type ***(see page 1 of the Instruction Booklet for how to sort and number your mail)***.

You need both this Question Booklet and the Answer Booklet. Open both this Question Booklet and the Answer Booklet to the color-coded pages for the type of mail you have (e.g., purple pages are First-Class Mail, blue pages are Standard Mail, etc.).

Each question sheet contains both questions (letters A, B, C, etc.) and answer codes (numbers 1, 2, 3, etc.). **Don't record your answers in this Question Booklet; instead, use the corresponding daily Answer Booklet.** Record the number that best matches your response.

Answer the questions about each mail piece down the answer sheet. For example, if you receive four (4) First-Class mail pieces on Monday, you will record answers to all questions about mail piece #1 in the first column, and about mail piece #2 in the second column, mail piece #3 in the third column, and #4 in the fourth column.

} *GO TO PAGE 5 (PURPLE)*

Packages & Expedited: ☐ **Total # Sent** → *GO TO PAGE 13 (GREEN)*

Answer Sheet Example

Please print clearly as in the example: 1 OR 20

Use a pen in black or blue ink
DO NOT USE PENCIL

As an example, let's say you received four First-Class mail pieces on Monday. Mail Piece #1 is a First-Class postcard from a mail order company, and Mail Piece #2 is a personal letter.

1. Open the **Question Booklet** to purple page 3, **First-Class / Presorted First-Class Mail Received**.
2. For question A, your number code is either: 1 (envelope), 2 (postcard), 3 (flyer or catalog), or 4 (envelope larger than letter size) as shown on the question sheet.
3. Write a "2" for a postcard in the first column under Mail Piece #1 (see below).
4. Finish answering the remaining questions (B-J) about the postcard.
5. Answer the same questions about Mail Piece #2, the letter from a friend, on the same page in the column under Mail Piece #2, then continue to record Mail Pieces #3 and #4.

Mail Piece #1
Postcard

Mail Piece #2
Personal Letter

Answer Sheet **Purple**

First-Class / Presorted First-Class Mail Received

Answer questions about each mail piece down the columns.
There are columns for up to 12 pieces of mail.

Questions are in the Question Booklet.	Mail Piece #1	Mail Piece #2	Mail Piece #3	Mail Piece #4	Mail Piece #5	Mail Piece #6	Mail Piece #7	Mail Piece #8	Mail Piece #9	Mail Piece #10	Mail Piece #11	Mail Piece #12
